Workshops: Creating an App for 11 BULLETS

1
Introduction of a versatile advanced shooting simulator for multiple applications.

2
Electronic enhancements for firearm replicas to enable tracking and wireless PC communication.

3
Website development and branding for 11bullets.com as part of the project.

Designs

The project has achieved its primary goal by delivering a sophisticated VR shooting system that caters to military training, civilian shooting, and e-sports scenarios.

Furthermore, the product website, 11bullets.com, has been designed with comprehensive graphical layouts and branding elements, providing a holistic solution for the client's needs.
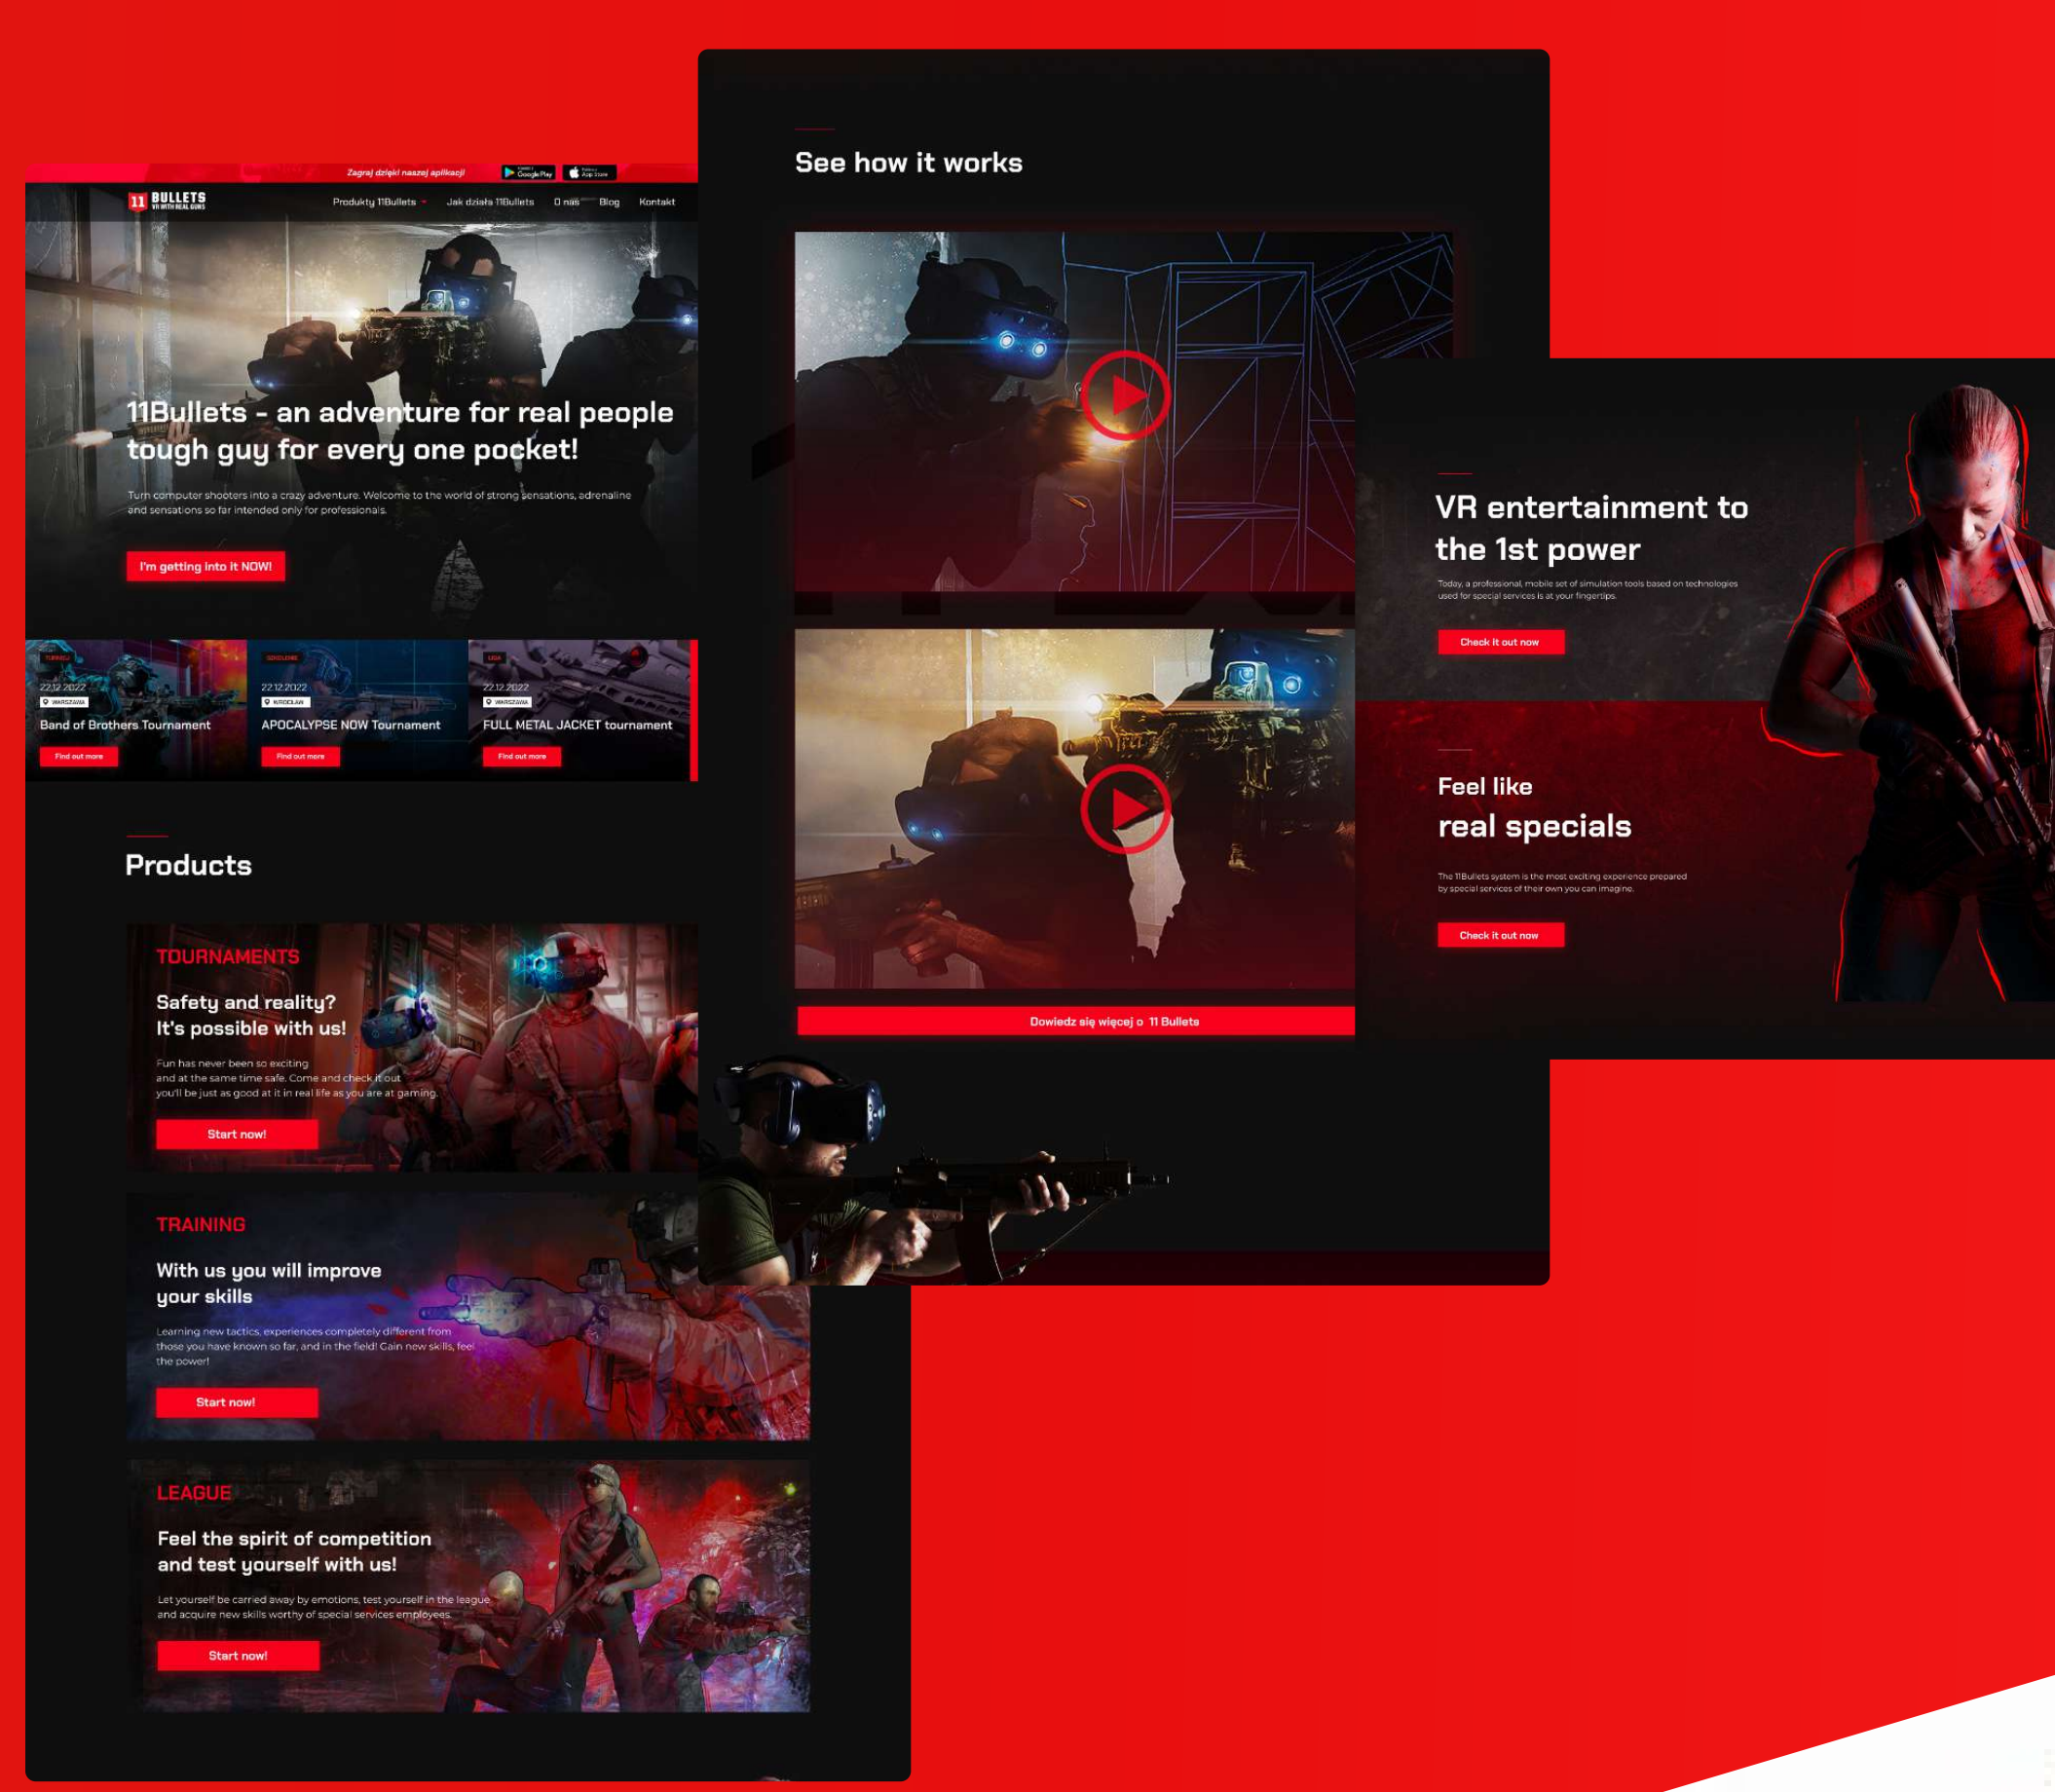

Mockup

The mockup stage included creating a user-friendly interface with 300DEVS Angular CDK and Google Material components.

Advanced tools and libraries reduced redundant code and maintained high implementation standards.

Testing

The application went through thorough quality testing to ensure user satisfaction.

Continuous monitoring and evaluation post-deployment ensured that it remained in line with its objectives and adapted to changing user needs.

Coding

The project delivered a versatile VR shooting system with electronic weapon replica upgrades for precise tracking. The 300DEVS Angular CDK ensured brand consistency and rigorous implementation standards, enhancing development efficiency.

Results

The project successfully met diverse training requirements, from military to e-sports scenarios, with user-centered website and application designs.

The developer-friendly ecosystem reduced errors and facilitated implementation for the development team.

VR entertainment to the 1st power
