

Bazo.io

We created a business lead generator that generates the highest conversion possible.

Workshops:

1

Development of a business lead generator, BAZO, designed to maximize conversion rates with minimal disruption to the user's browsing experience.

2

Utilizing advanced algorithms and artificial intelligence to identify website visitors and tailor personalized messages to encourage customer engagement.

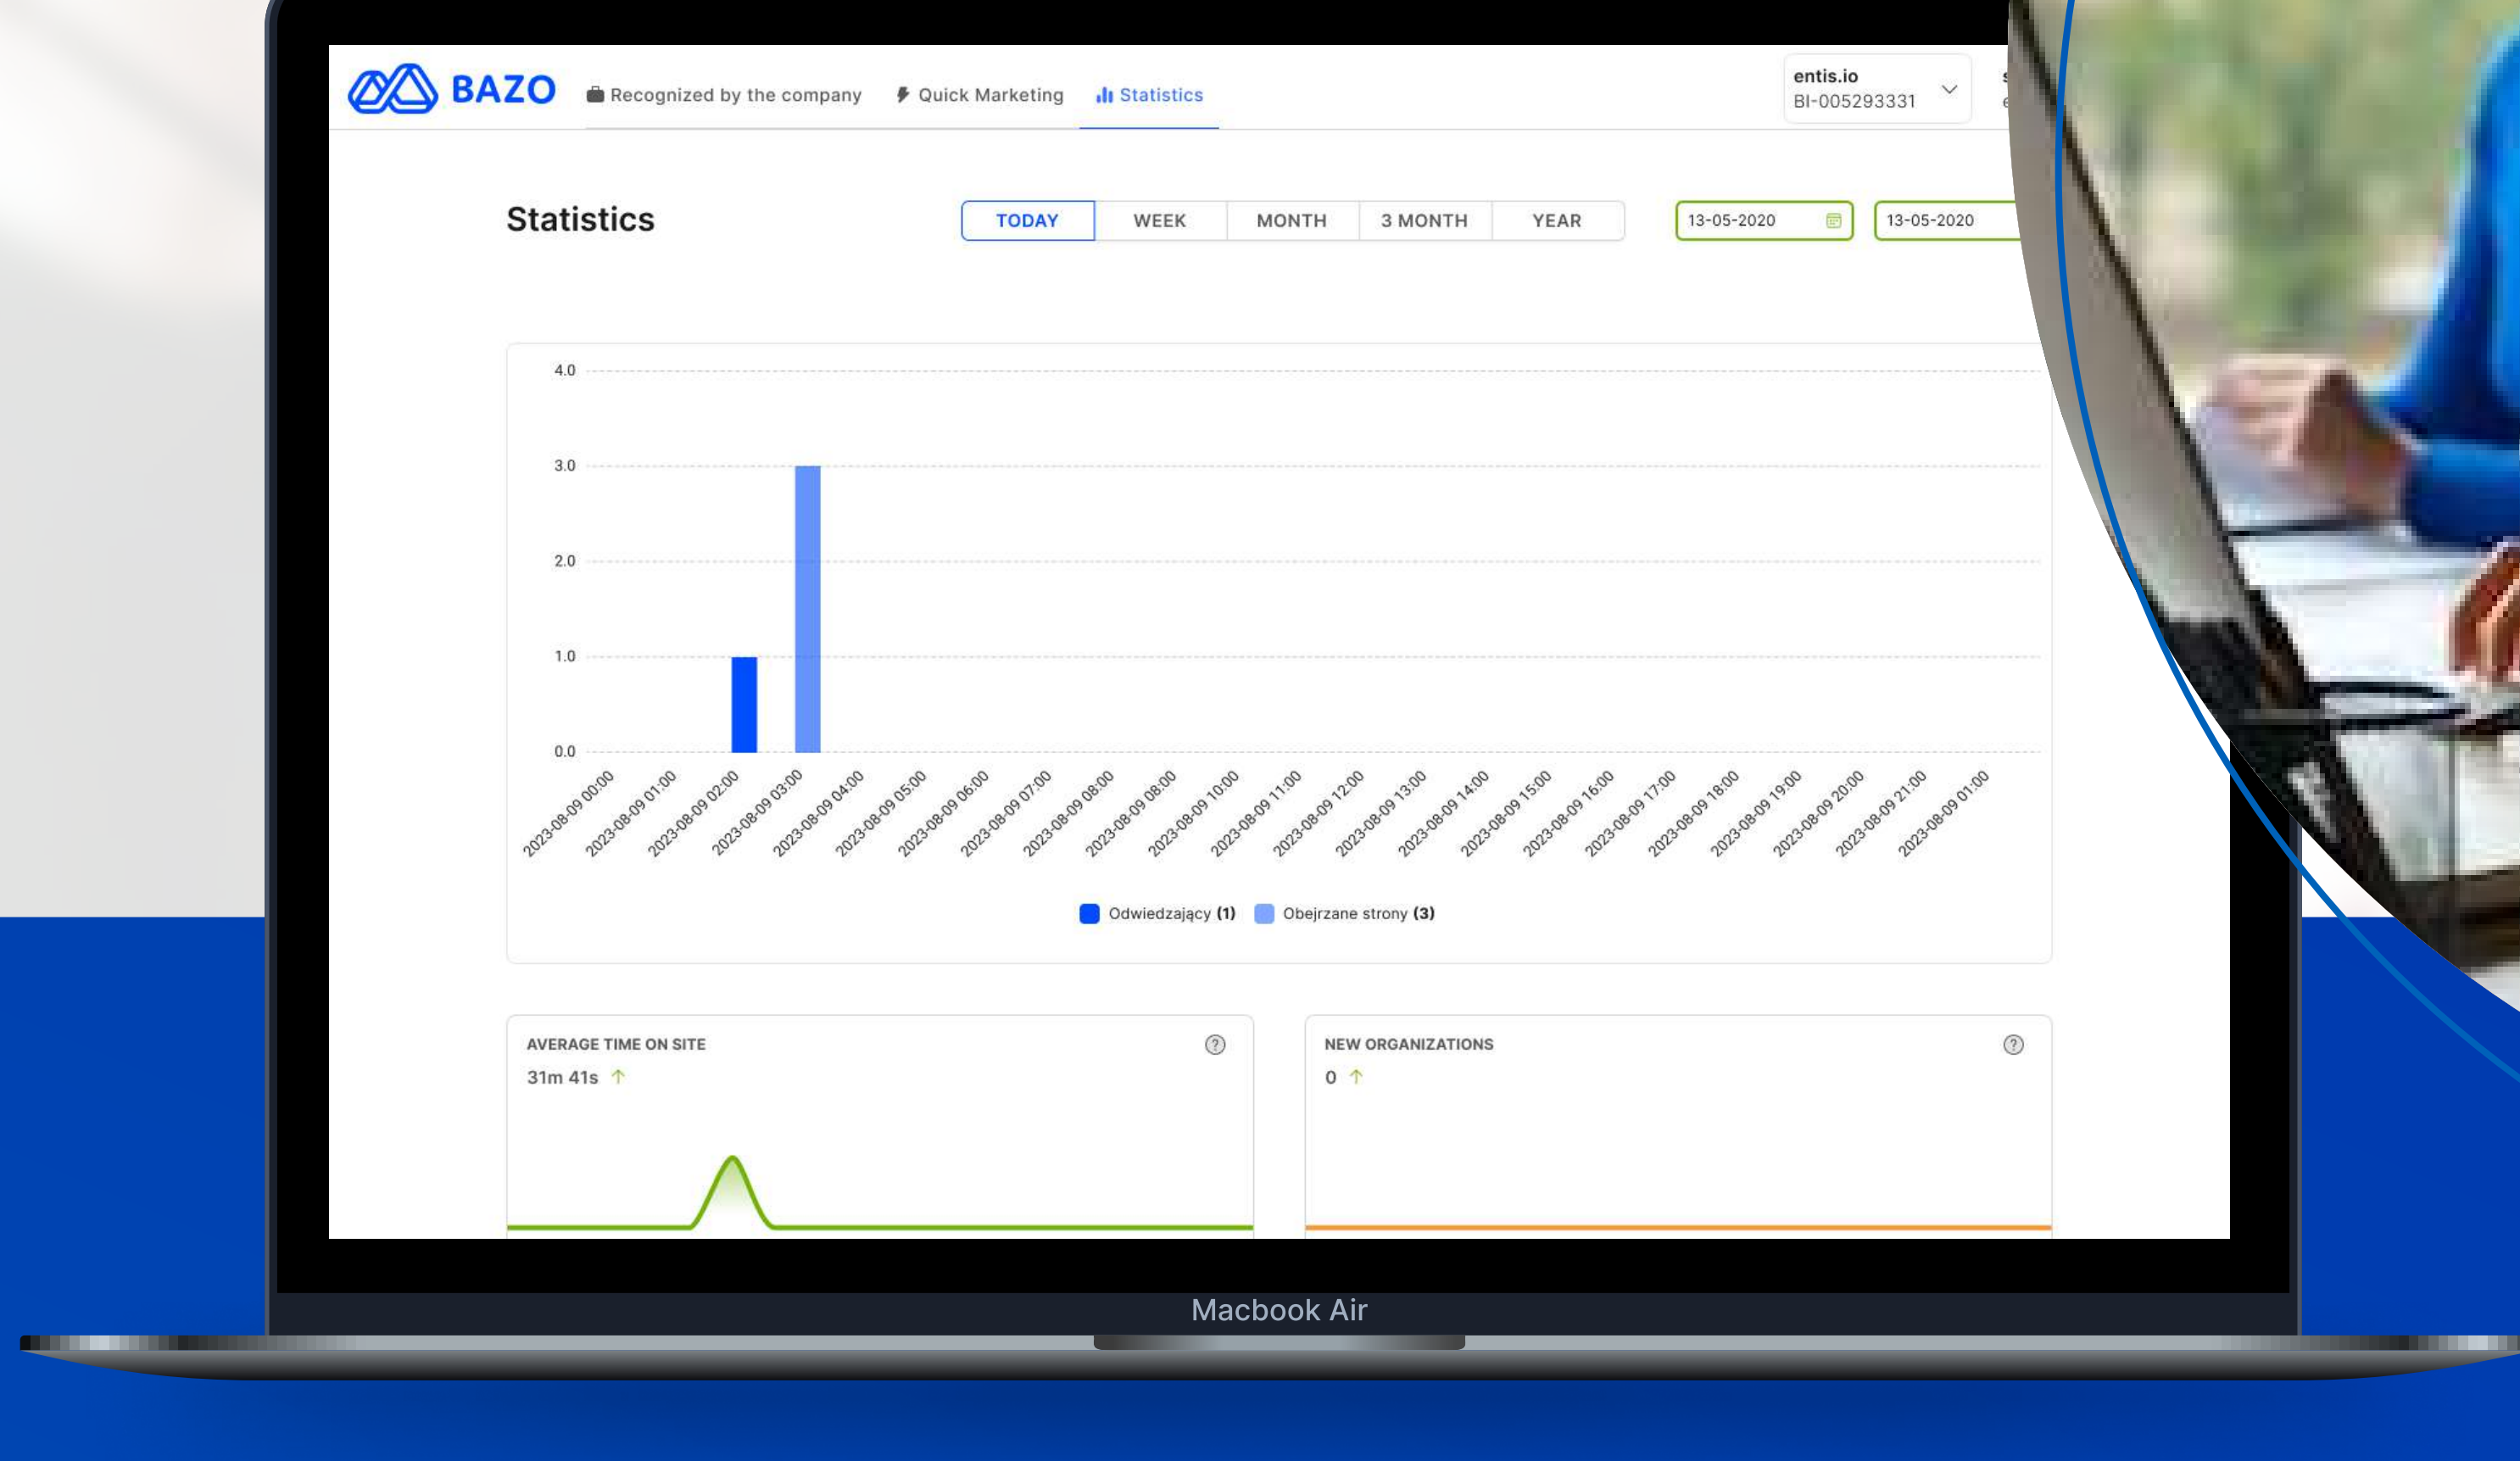

3

BAZO's ability to transform anonymous visitors into potential customers by capturing relevant information like messages, email addresses, or phone numbers.

Designs

We initiated the design process by creating prototypes and setting design goals.

This design phase heavily relied on the integration of components from libraries within our ecosystem, the 300DEVs Angular CDK, providing an interactive and ready-made framework rooted in Google Material design principles.

Mockup

Designers constructed application screens using these pre-existing components, ensuring a consistent and user-friendly appearance throughout the application.

Testing

Extensive testing procedures were executed to verify the functionality and efficiency of BAZO, preparing it for the demanding task of lead generation.

Coding

The development phase was streamlined using the Angular CDK, facilitating the creation of various UI components and ensuring the highest level of design compliance.

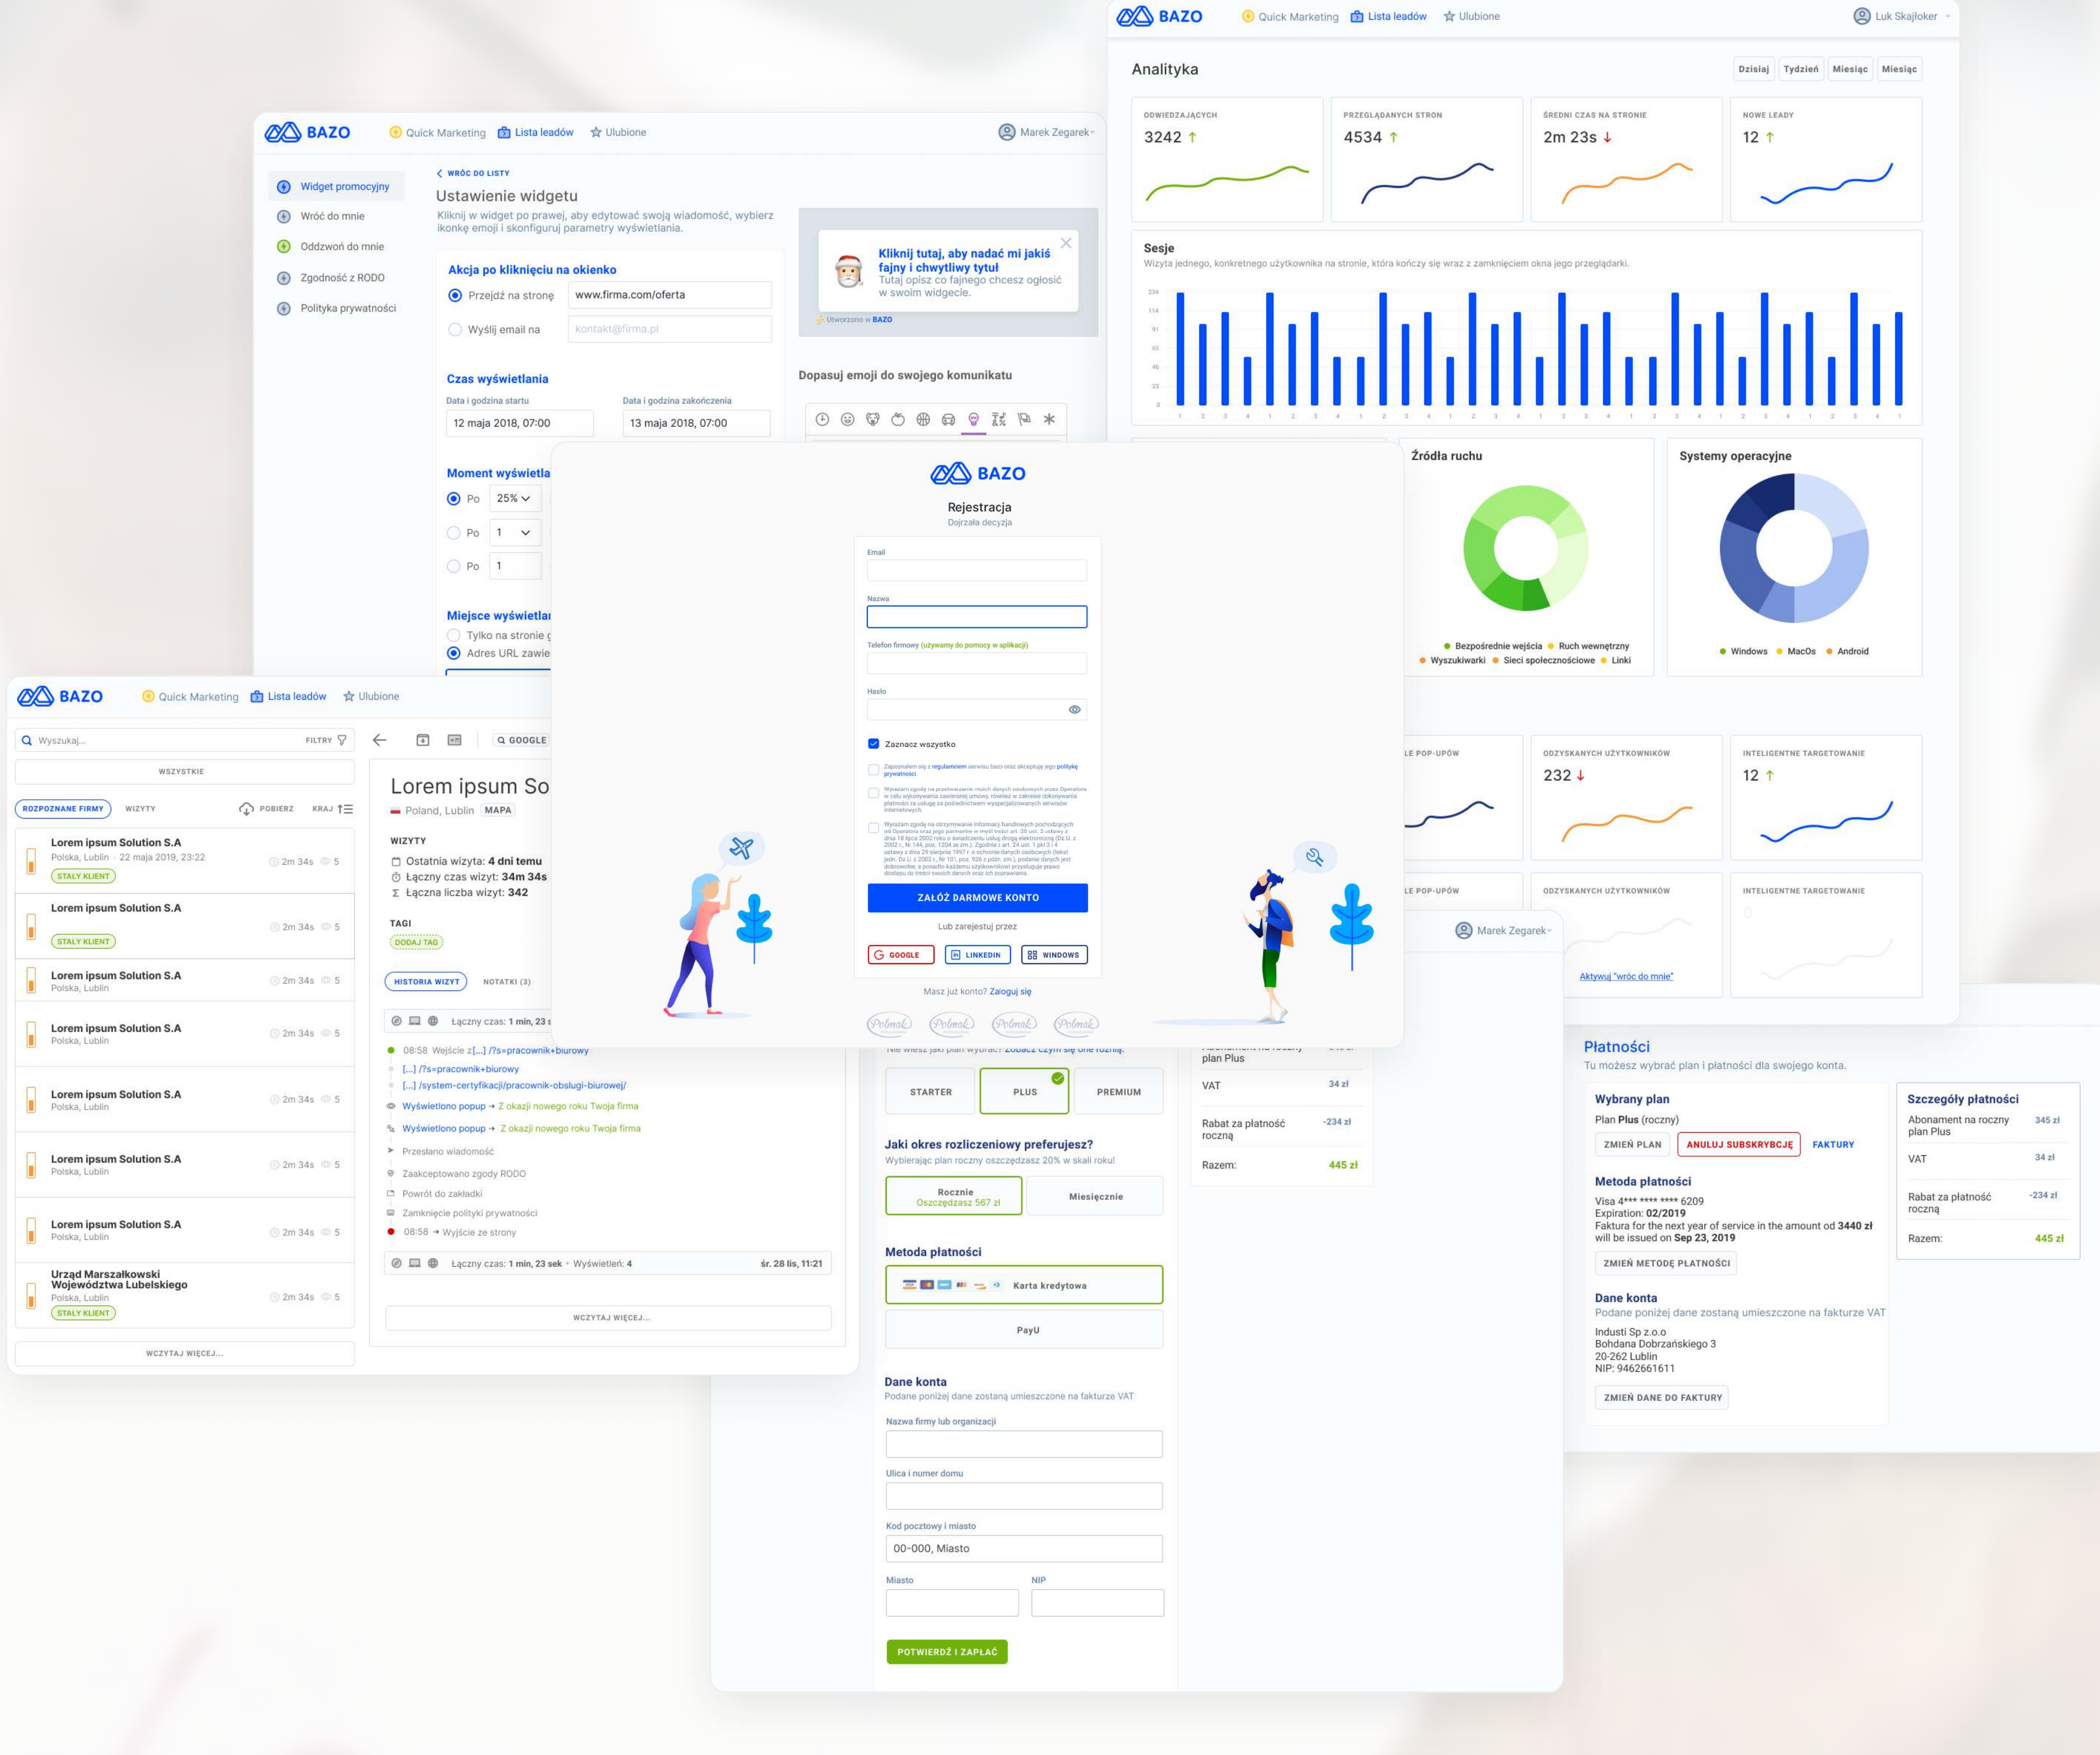

This led to the implementation of an advanced lead generation system.

Results

The result is BAZO, a cutting-edge business lead generator driven by advanced algorithms and artificial intelligence. It seamlessly integrates Figma-based designs, Angular CDK components, and rigorous testing to maximize conversion rates for businesses while minimizing disruption to user browsing. BAZO's design, development, and testing processes ensure a high standard of implementation and a powerful tool for lead generation.

Our achievements highlight our commitment to creating the perfect solution for you. Contact us to discuss tailoring an application to your specific needs.
