

Dietomatic.pl

An innovative system for personalized diet food delivery plans

UX / UI / Development

Workshops: Creating an App for Dietomatic.pl

1

Dietomatic revolutionizes diet planning with a user-friendly system for personalized food delivery plans, tackling the growing demand for healthier meals.

2

The comprehensive system streamlines the management of an extensive database of diets and caterers, offering an intuitive diet wizard and empowering customers to adapt their orders on the go.

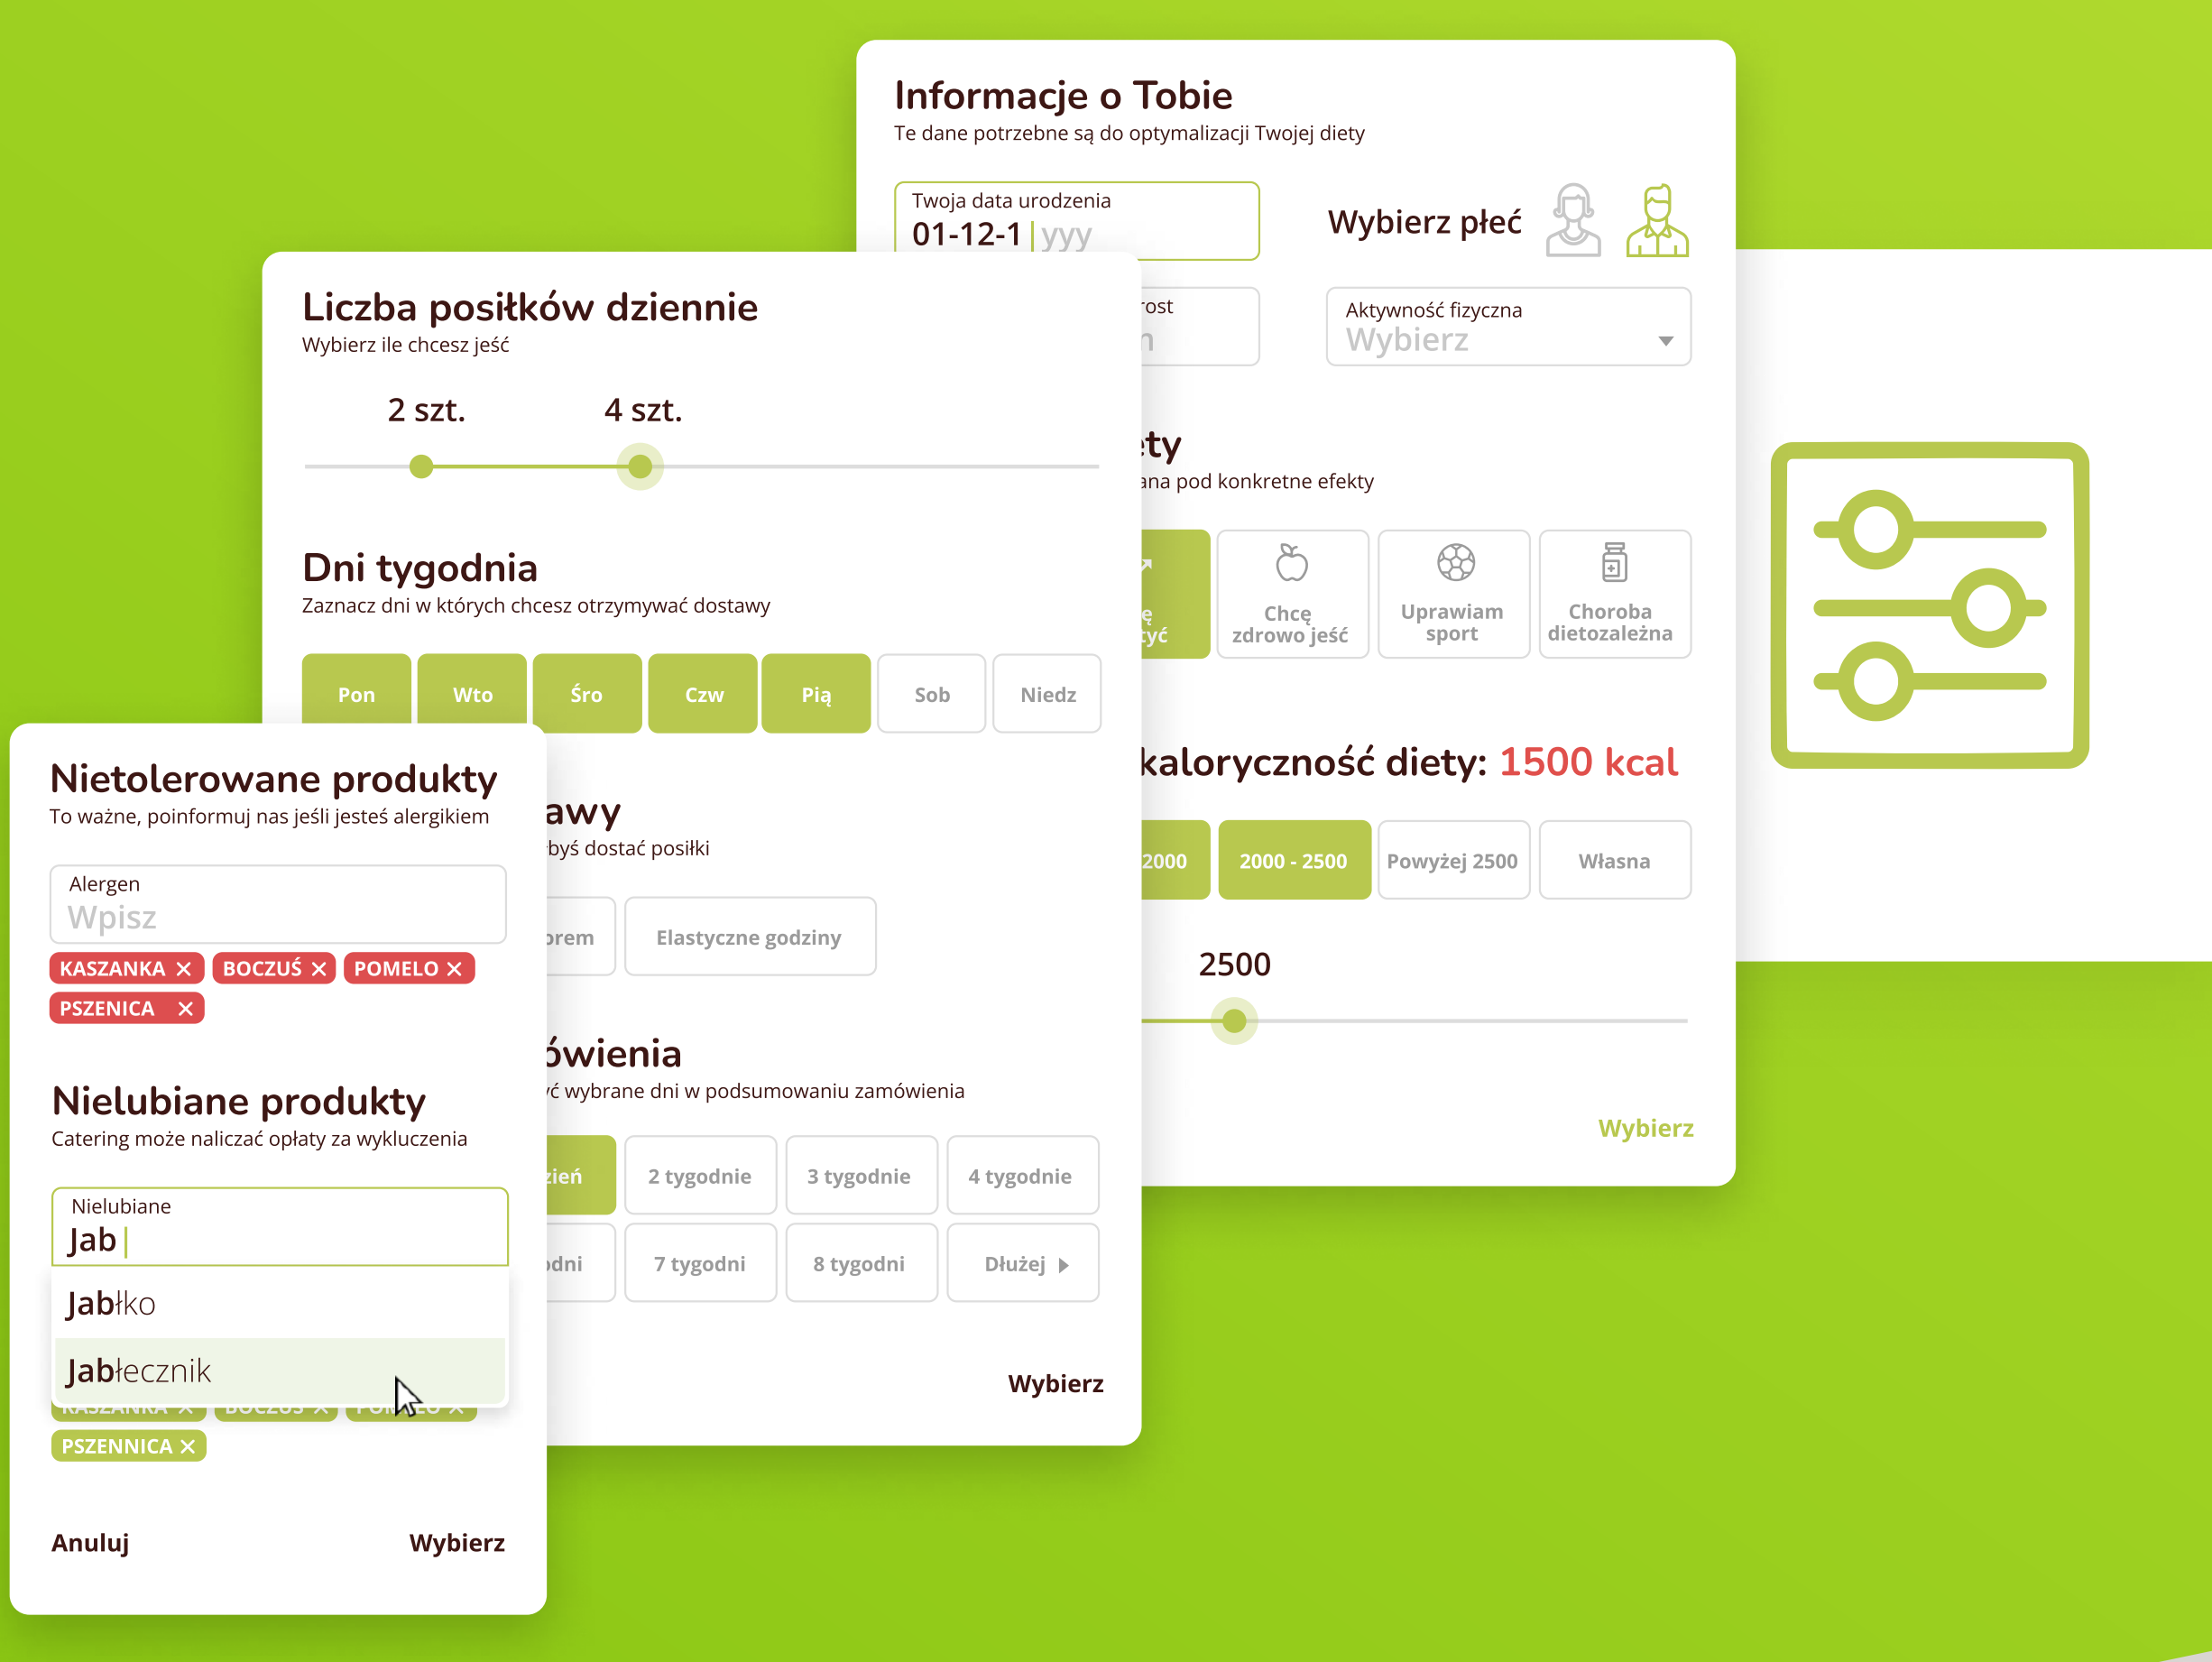

3

Future enhancements aim to further optimize catering profiles and introduce efficient delivery mapping and kitchen modules.

Designs

The project initiated with the design phase, creating an interface that allows users to easily browse, compare, and customize their personalized diet food delivery plans.

The design focused on creating an intuitive and visually appealing platform, featuring a logo that combines a square and slider filters to symbolize food delivery boxes and customization options.

Mockup

Design mockups were developed to provide a user-friendly interface, guiding users through the process of diet customization and delivery options.

This step involved planning the layout, user flow, and visual elements of the system.

Testing

Extensive testing was conducted to ensure the system's functionality and responsiveness, allowing users to smoothly browse, compare, and customize their diet plans.

This step aimed to identify and rectify any issues or glitches to guarantee a seamless user experience.

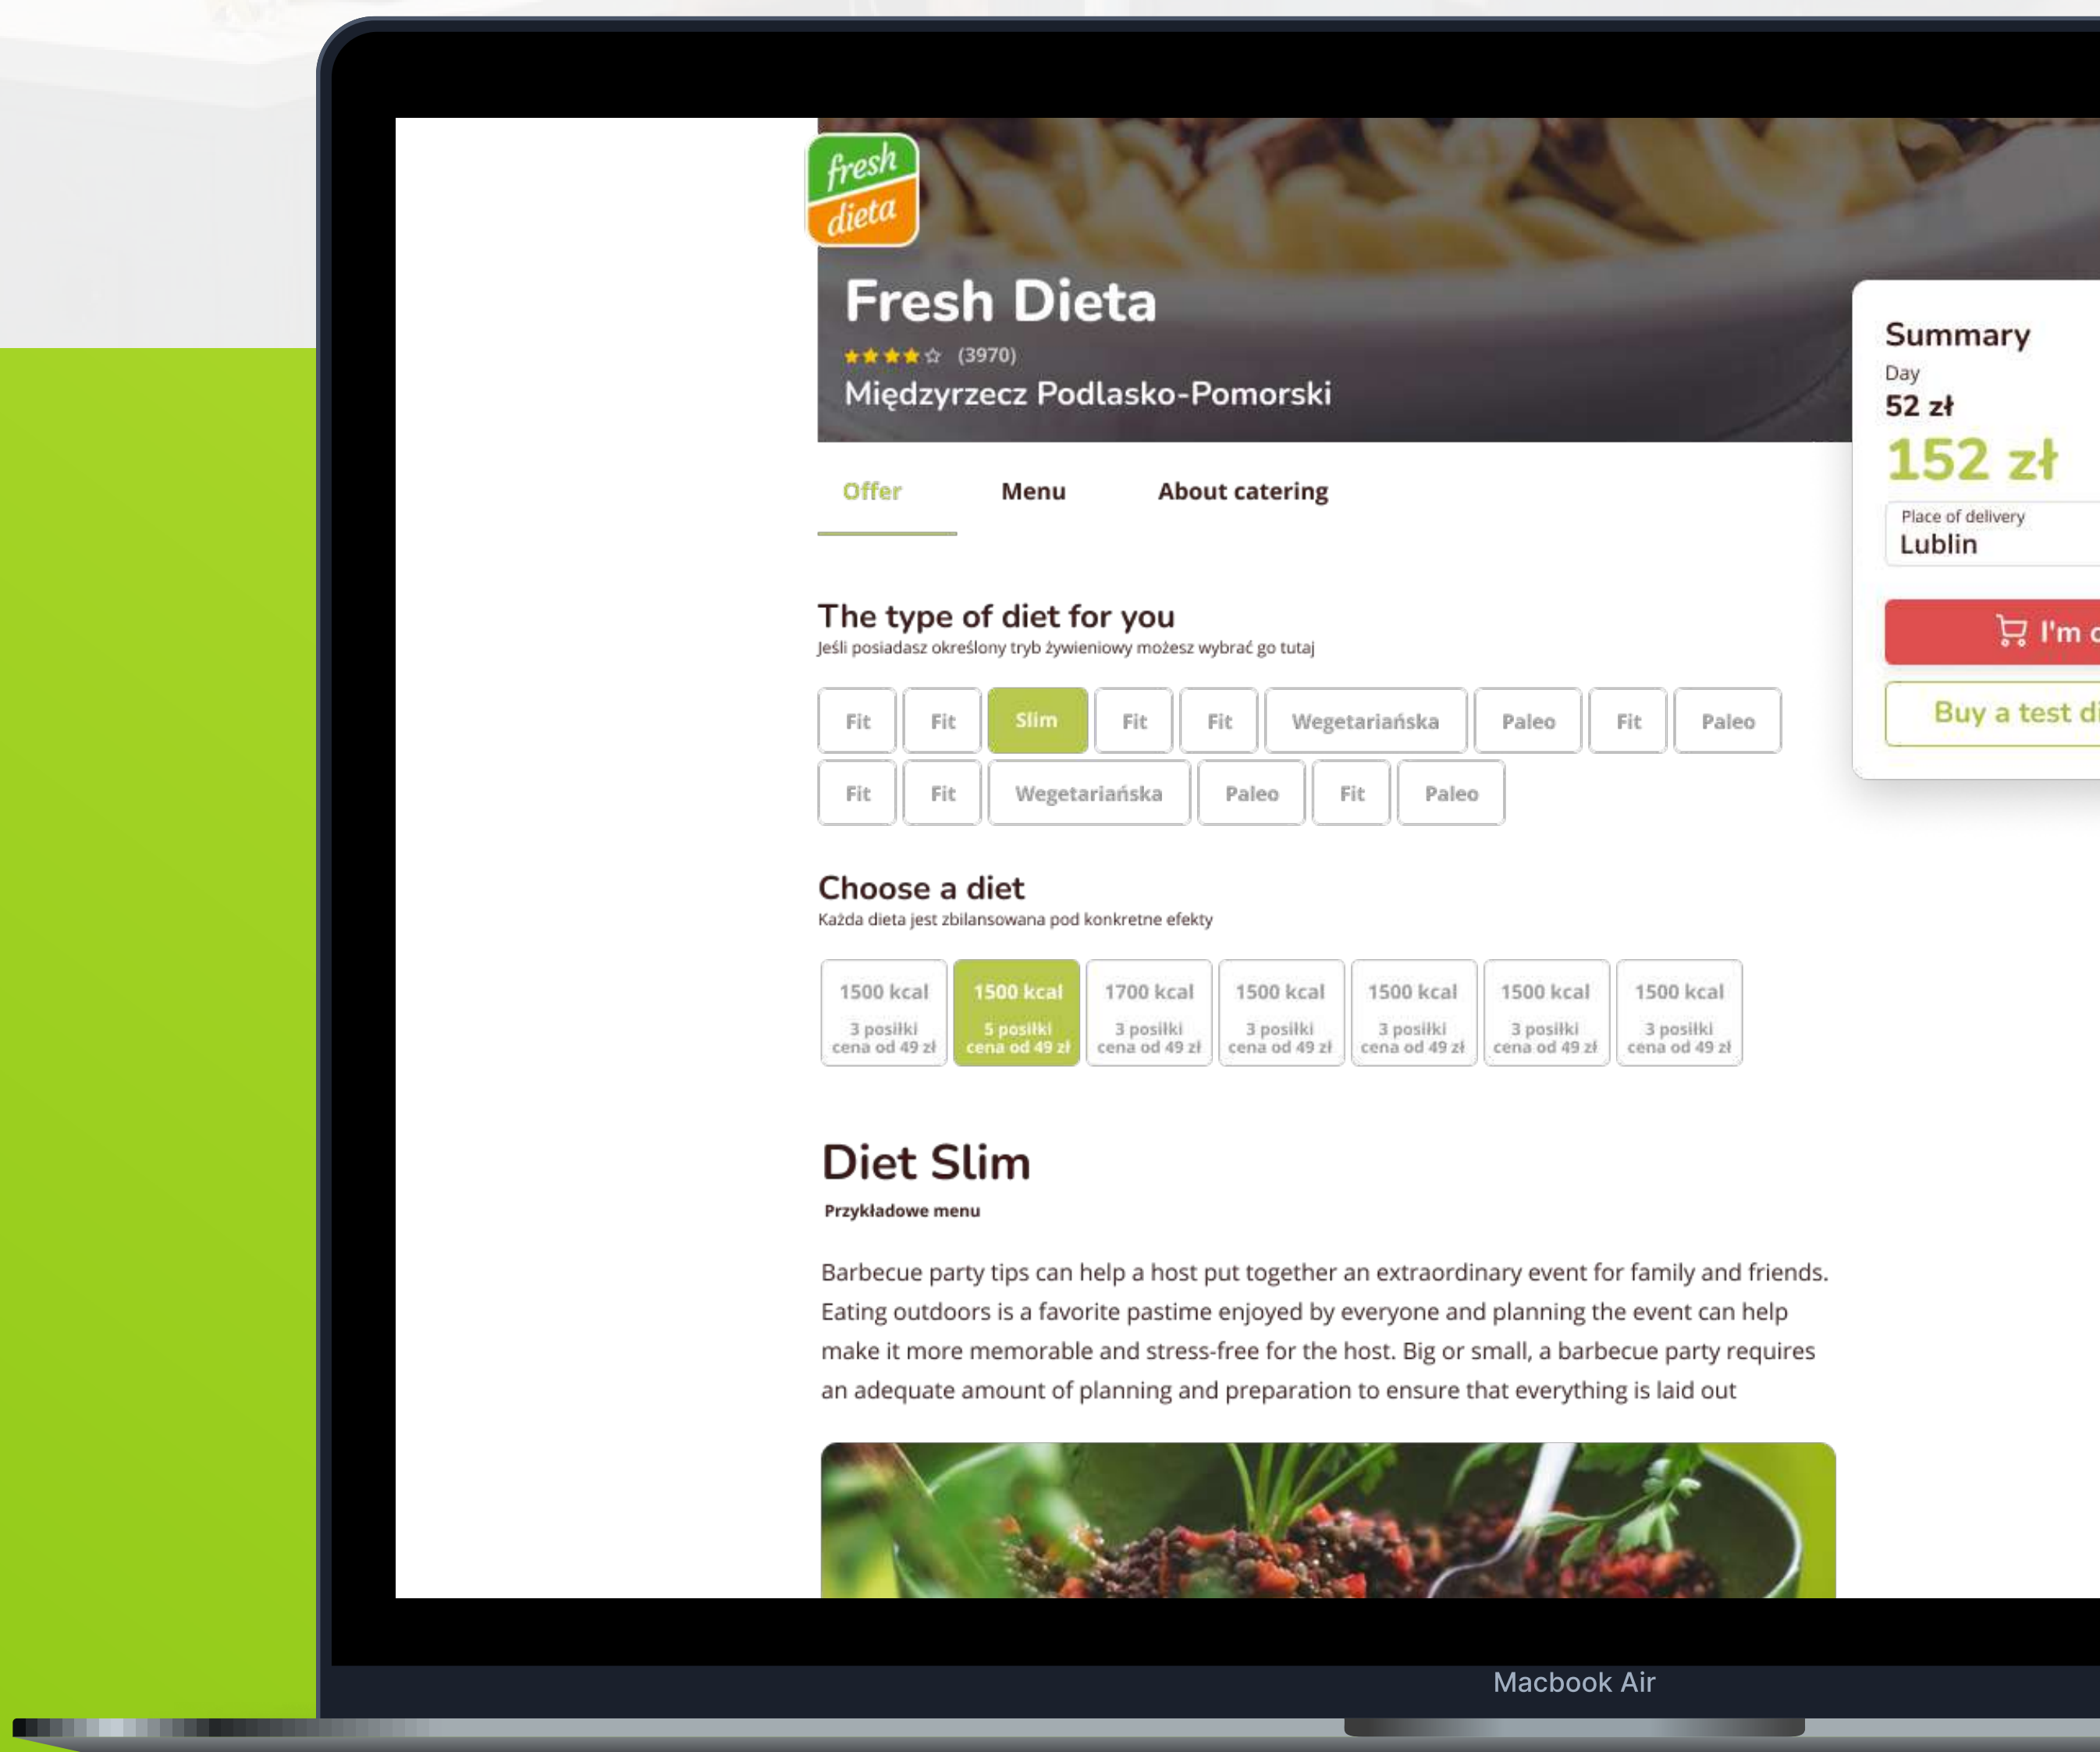

Coding

The development phase included coding the system using the 300DEVs Angular CDK framework, based on Google Material design patterns, creating a responsive platform for efficient food catering services with customizable diets, order tracking, and delivery options.

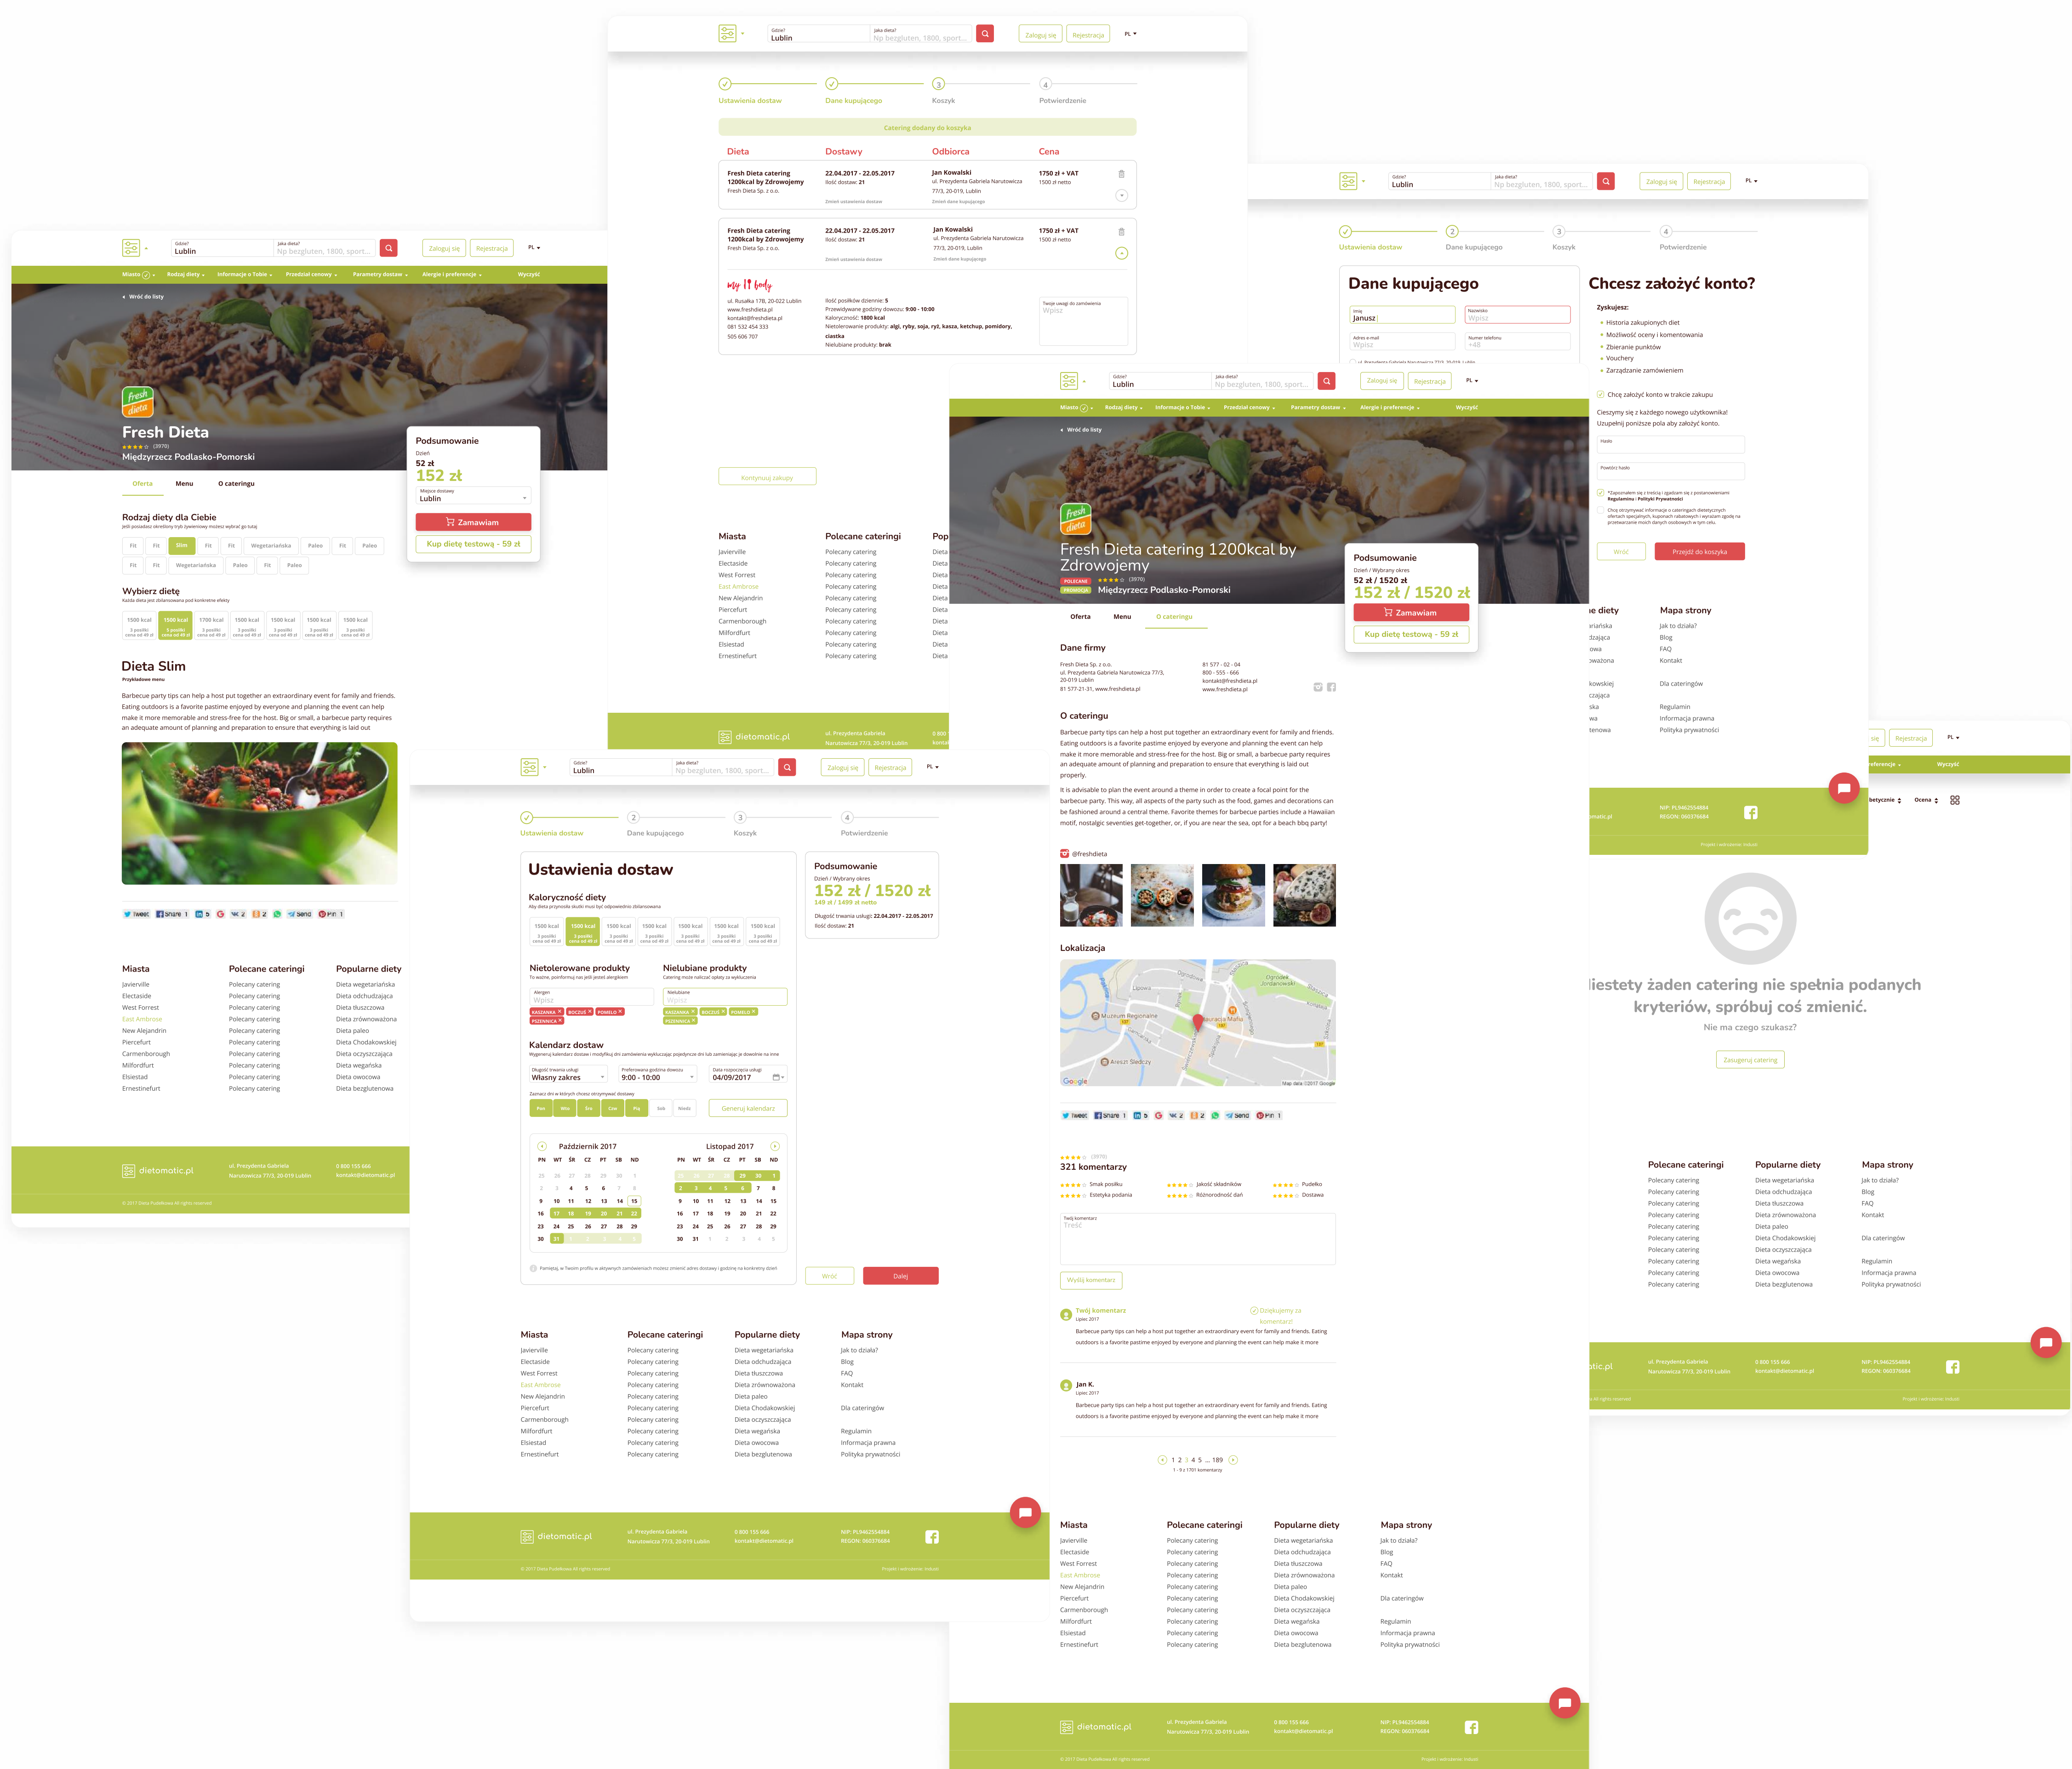

Results

Dietomatic enables users to personalize diet food delivery plans by defining goals, meal types, dietary restrictions, and more.

The platform offers order management with tracking and delivery adjustment options. Future plans involve enhancing caterer profiles and adding modules for mapping, route planning, grocery lists, and recipes.

Our achievements highlight our commitment to creating the perfect solution for you. Contact us to discuss tailoring an application to your specific needs.
