

Workshops:

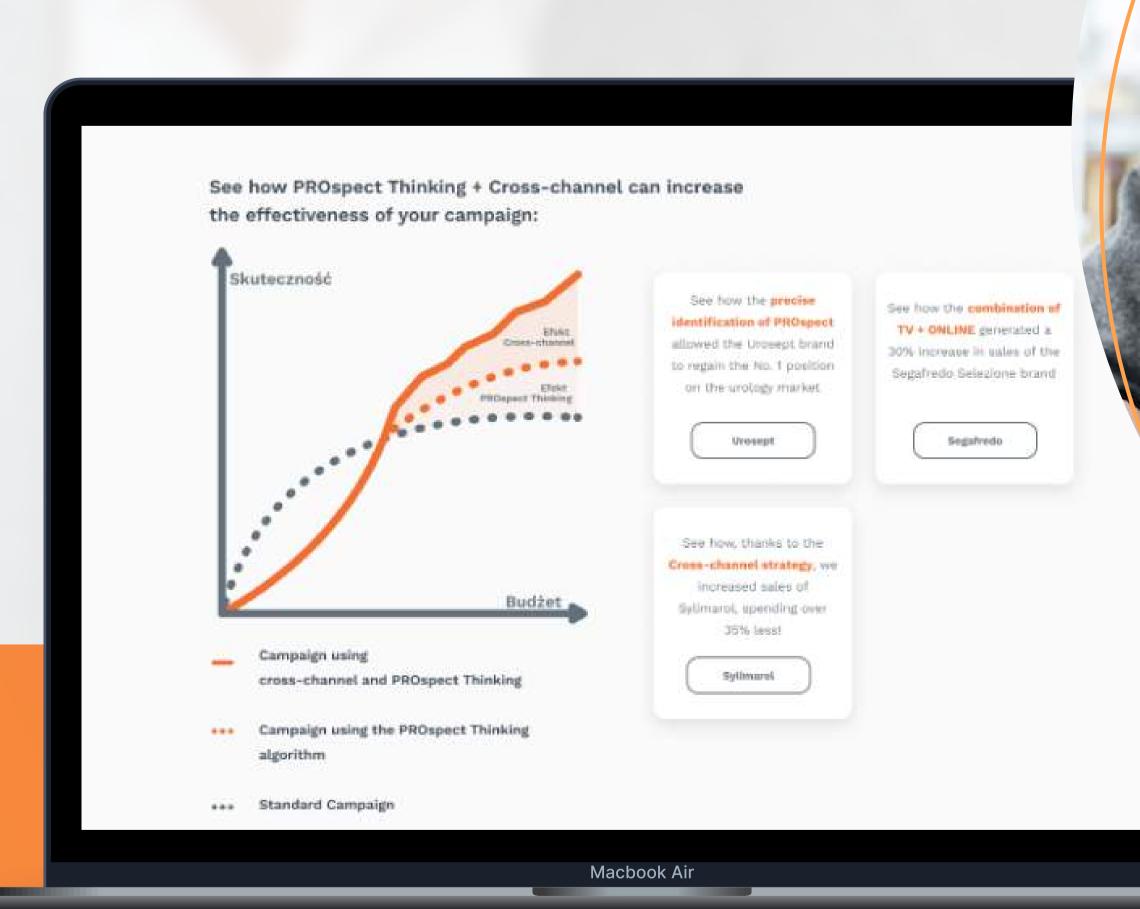

Created a user-friendly website showcasing PRO Media's services and company updates, simplifying their message in the midst of media chaos to effectively reach consumers.

Designs

The project commenced with the design phase, where we crafted a user-friendly website to present the services provided by PRO Media House.

Google Material design patterns were used to create a visually appealing and intuitive user interface that would effectively convey the company's capabilities.

Mockup

Design mockups were created to visually represent the website, emphasizing the services offered by the company.

The design aimed to provide visitors with a clear understanding of the company's expertise in conducting successful media

campaigns.

Testing

A thorough testing process was carried out to ensure the website's functionality and user-friendliness.

Testing focused on the user experience, ensuring that visitors could easily access information about the company's services and updates.

Coding

The website was developed using the 300DEVS Angular CDK, which adheres to Google Material design patterns. This framework allowed for the creation of a highly functional and visually appealing website that effectively conveys the company's services and updates.

Results

company's ability to conduct effective and cost-efficient media campaigns. Google Material design patterns ensure a visually appealing and intuitive interface, enhancing the overall user experience and making it easy for visitors to understand the

The result is the PRO Media website, a user-friendly platform that effectively showcases the

company's services and updates.
