### Workshops: Creating an website for TK DEWELOPER

#### 1

Created a robust application for TK DEWELOPER, a company with a decade of experience in the construction industry, using industry-standard tools and established design patterns.

#### Z Developed a highly intuitive user interface based on Google Material design patterns and the 300DEVS Angular CDK, ensuring an exceptional user experience.

#### 3

The application empowers TK DEWELOPER to optimize their construction projects, streamline operations, and provide effective solutions in the competitive building industry.

# Designs

**Current offer** 

The development process for the TK DEWELOPER application commenced with comprehensive design concepts.

These designs were tailored to the specifics of the construction industry, aligning with the company's expertise and operational requirements.

# Mockup

### Testing

# Coding

Detailed mockups were crafted to outline the user interface and functionality of the application.

These mockups were customized to reflect TK DEWELOPER's involvement in the construction sector, providing insights into their services and business operations. A meticulous testing phase ensured the reliability and performance of the application.

Special emphasis was placed on validating the app's suitability within the construction industry and its seamless integration with TK DEWELOPER's business processes. Utilizing the 300DEVS Angular CDK and Google Material design patterns, the application was coded to ensure a robust and userfriendly interface.

These tools played a significant role in streamlining the application's functionality and design.

#### **Investment details**

We offer two semi-detached buildings in the prestigious Sławinki district. The investment is located single-family buildings, in the vicinity of recreational areas and bicycle paths. An additional advantation access from the center, which will take less than 10 minutes. Both young people leading an active life families with children and well-deserved retirees who particularly care about peace and proximity to find a home for themselves here.

The investment includes 4 two-level residential premises with an area of 133 m2, which on the first the height rooms without slopes (unlike houses with an attic) and an open space in the attic with the peradaptation to additional rooms. Each apartment has an attached garden and a garage in the building space in front of it.
