TRANSKOBET

Developing a Tailor-Made Application for TRANSKOBIET

Workshops: Creating an App for TRANSKOBIET

1
Developed a comprehensive application for the construction company TRANSKOBIET to centralize and manage site data efficiently, including topographical differences and project dimensions.

2
Utilized well-established industry tools and seamlessly integrated design and code based on Google Material design patterns and the 300DEVS Angular CDK
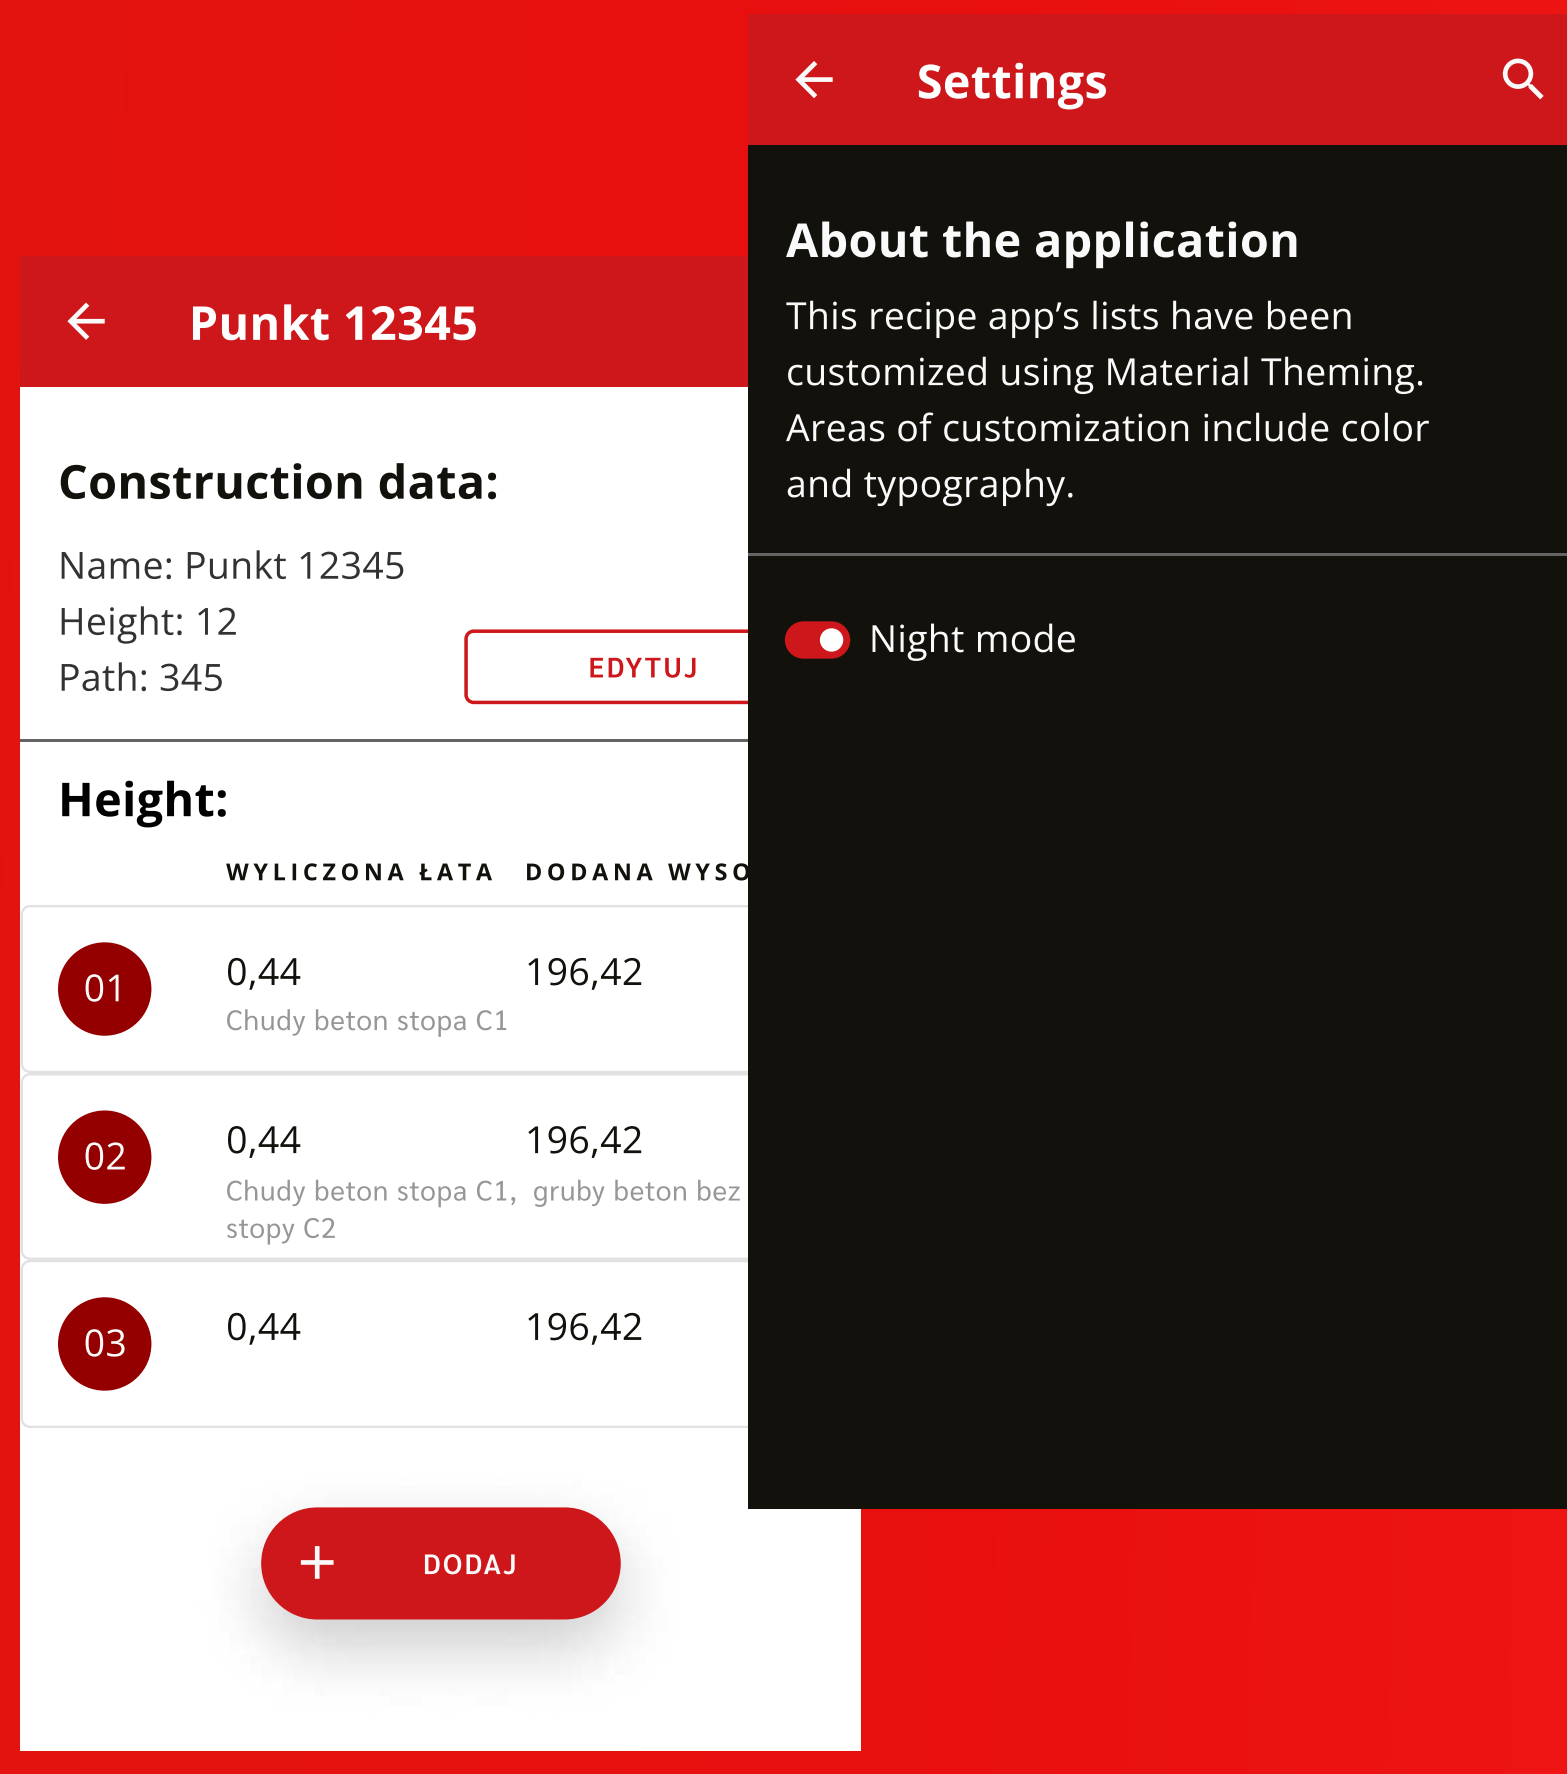

3
Created an application that gathers, organizes, and allows users to input site-related data, streamlining project management for TRANSKOBIET.

Designs

The application creation began with designing an intuitive interface focused on gathering construction-related data for the company TRANSKOBIET.

Google Material design patterns were applied to ensure a user-friendly and visually appealing application.

Mockup

Design mockups were created to outline the interface layout, emphasizing data collection functionalities for construction-related information.

The mockups ensured a clear and practical representation of the application's purpose.

Testing

Extensive testing procedures were conducted to validate the app's functionality and user experience.

The focus was on ensuring the ease of collecting and inputting construction data, addressing terrain differences, and defining building dimensions within the app.
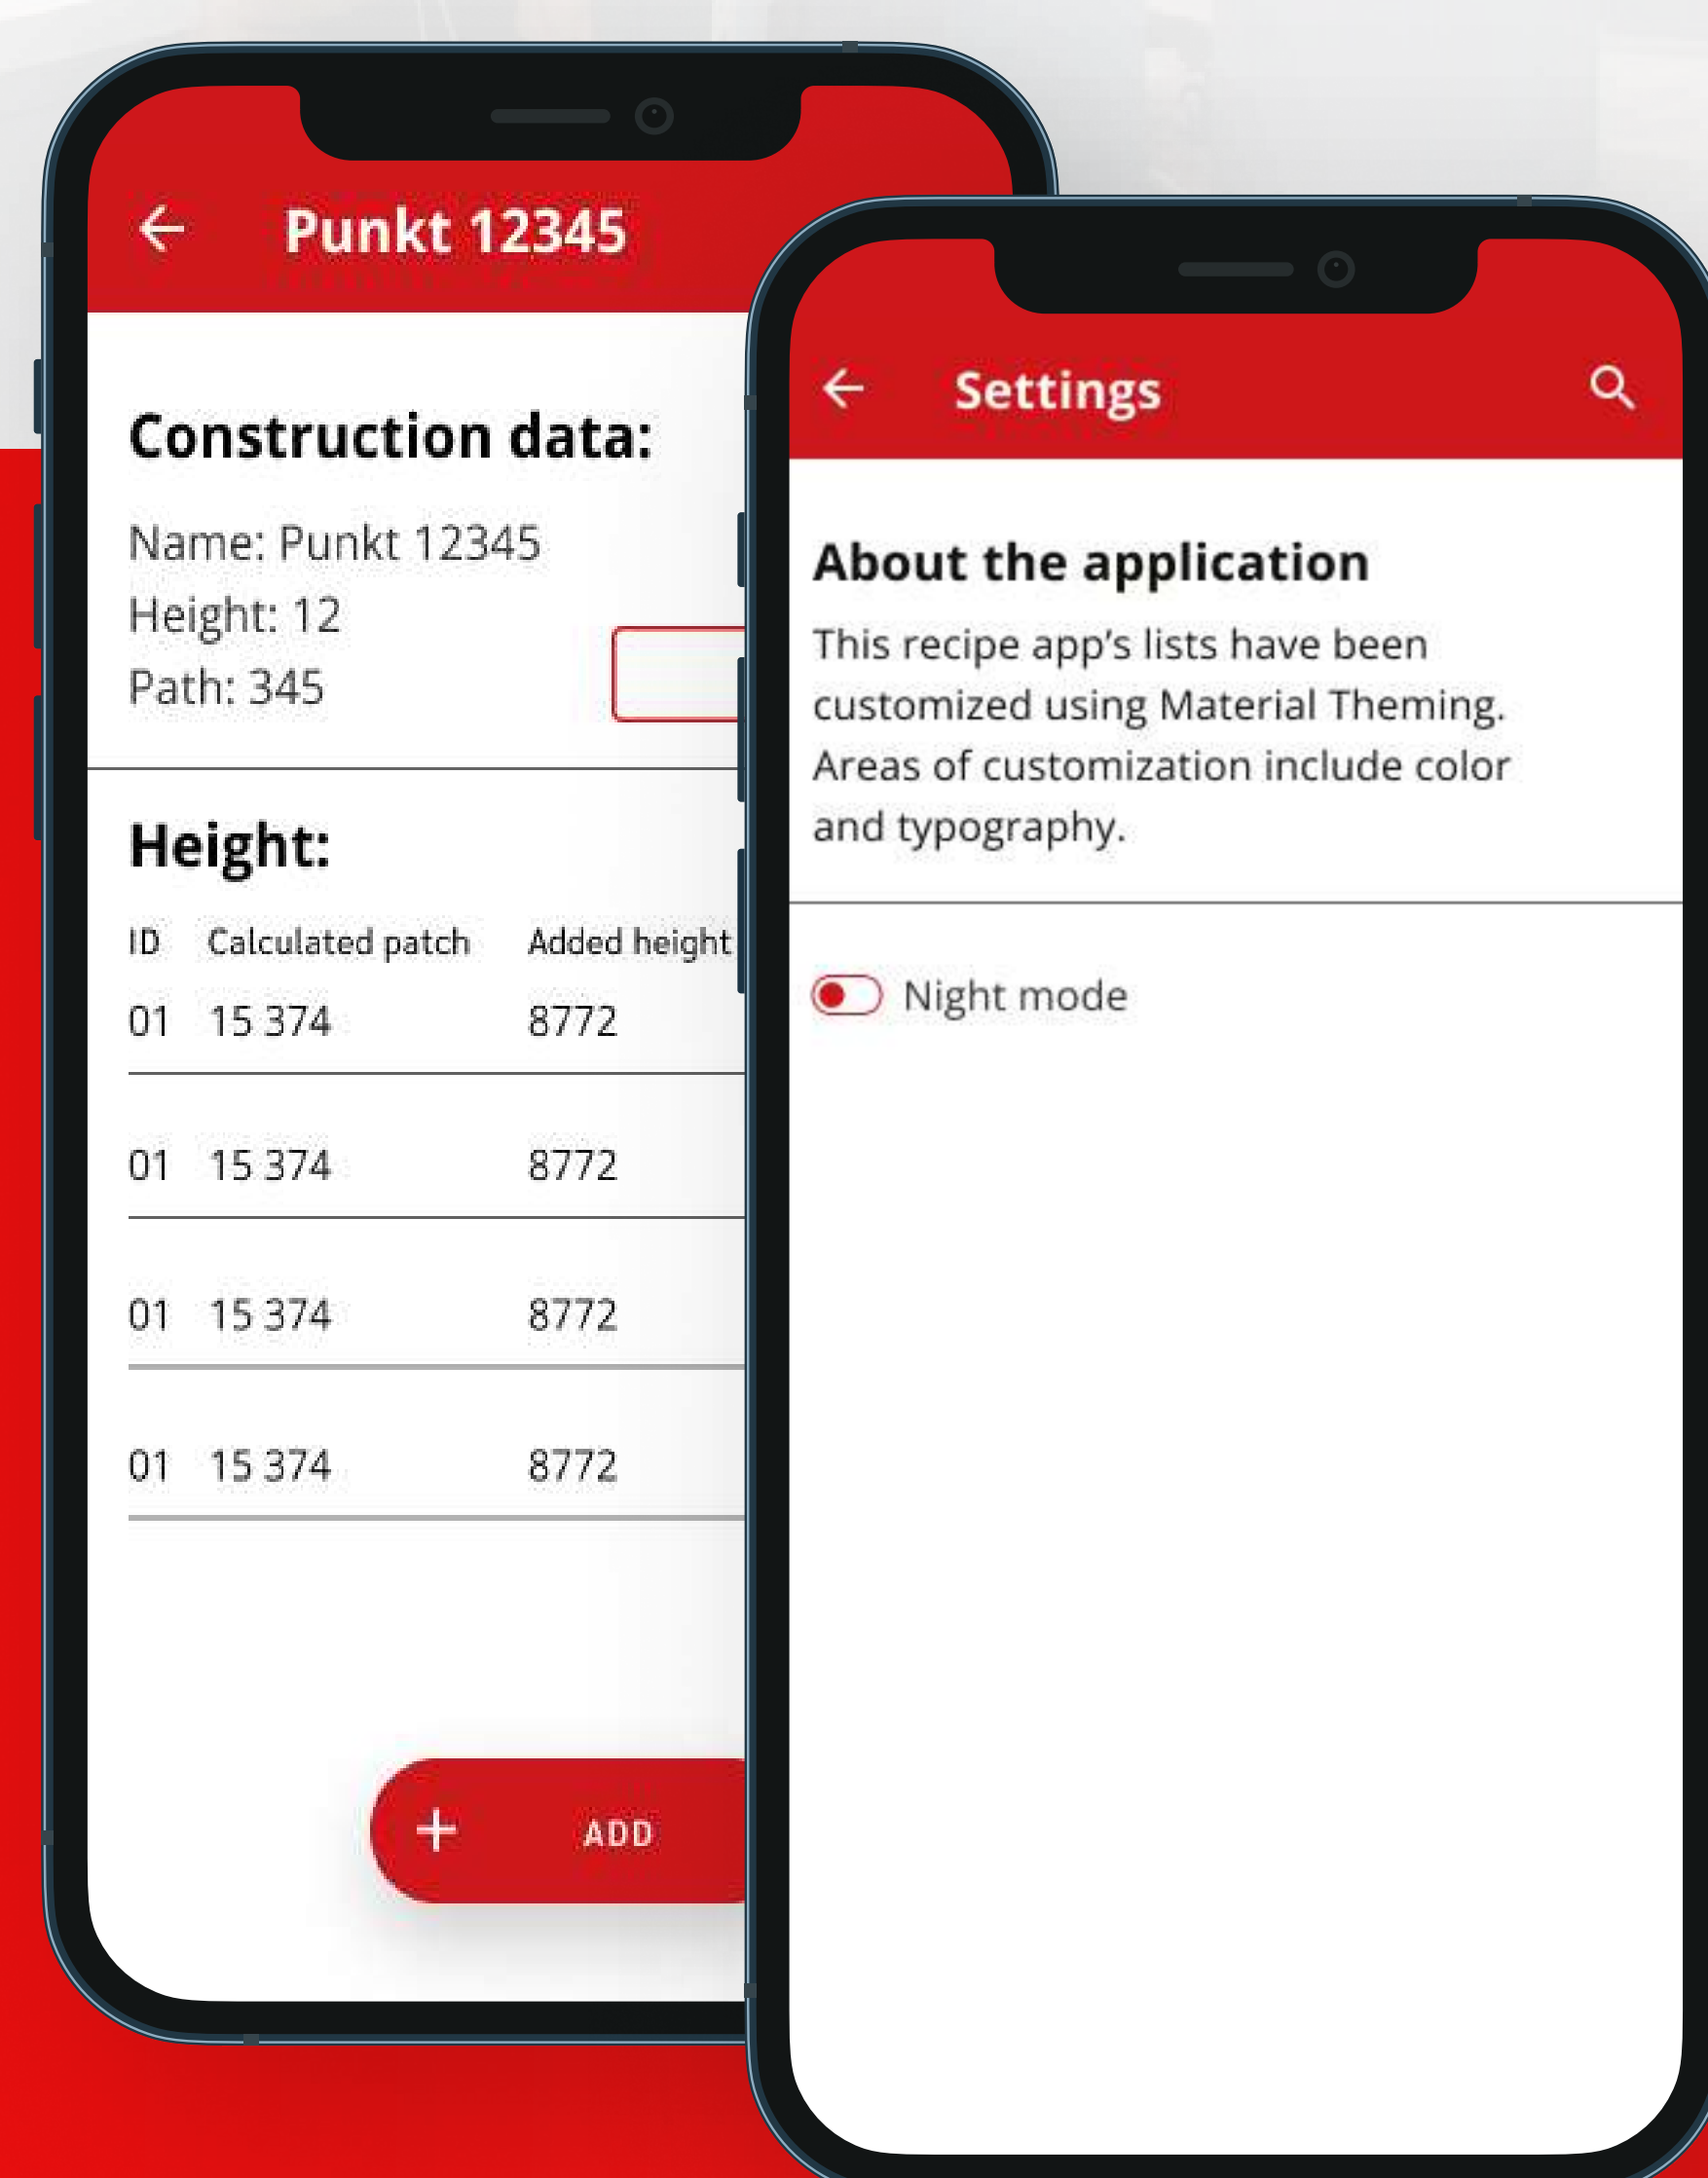

Coding

The app was developed using the 300DEVS Angular CDK, aligning with Google Material design standards.

This coding process enabled the creation of an application that simplifies data collection for construction purposes.

Results

The end product is the TRANSKOBIET construction application. It provides a user-friendly platform for collecting and recording construction data in one place, catering to the needs of users dealing with terrain differences, construction site locations, and dimensional specifications. The app, built on Google Material design patterns using 300DEVS Angular CDK, ensures a smooth user experience for the management of construction-related information.

Our achievements highlight our commitment to creating the perfect solution for you. Contact us to discuss tailoring an application to your specific needs.
