Workshops: Creating a website for TEZET

1 Developed an application for TEZET, a company specializing in Autocstern Deliveries, Wholesale Sales, Heating, and the import of high-quality gas products.

2 Leveraged well-established industry tools to design and implement a user-friendly platform based on Google Material design patterns and the 300DEVS Angular CDK.

3 Created an application that provides TEZET with efficient management and control over their diverse services and high-quality product offerings, streamlining their operations.

Designs

The application development process for TEZET began with the creation of comprehensive designs.

These designs focused on aligning with the specific needs of TEZET, which deals with Autocystern deliveries, wholesale distribution, gas cylinder heating, and the import of high-quality products.

Autogas	Heating	Gas cylinders	Transshipment terminal

Mockup

Design mockups were developed to represent the user interface and functionalities, ensuring that they cater to TEZET's diverse range of services, including safe and efficient gas delivery and heating solutions.

Testing

A thorough testing phase was carried out to validate the application's performance and functionality, especially in the context of Autocystern deliveries and the wholesale distribution process.

Ensuring the quality and reliability of the application was a key objective.

Coding

The application was coded using the 300DEVS Angular CDK and Google Material design patterns.
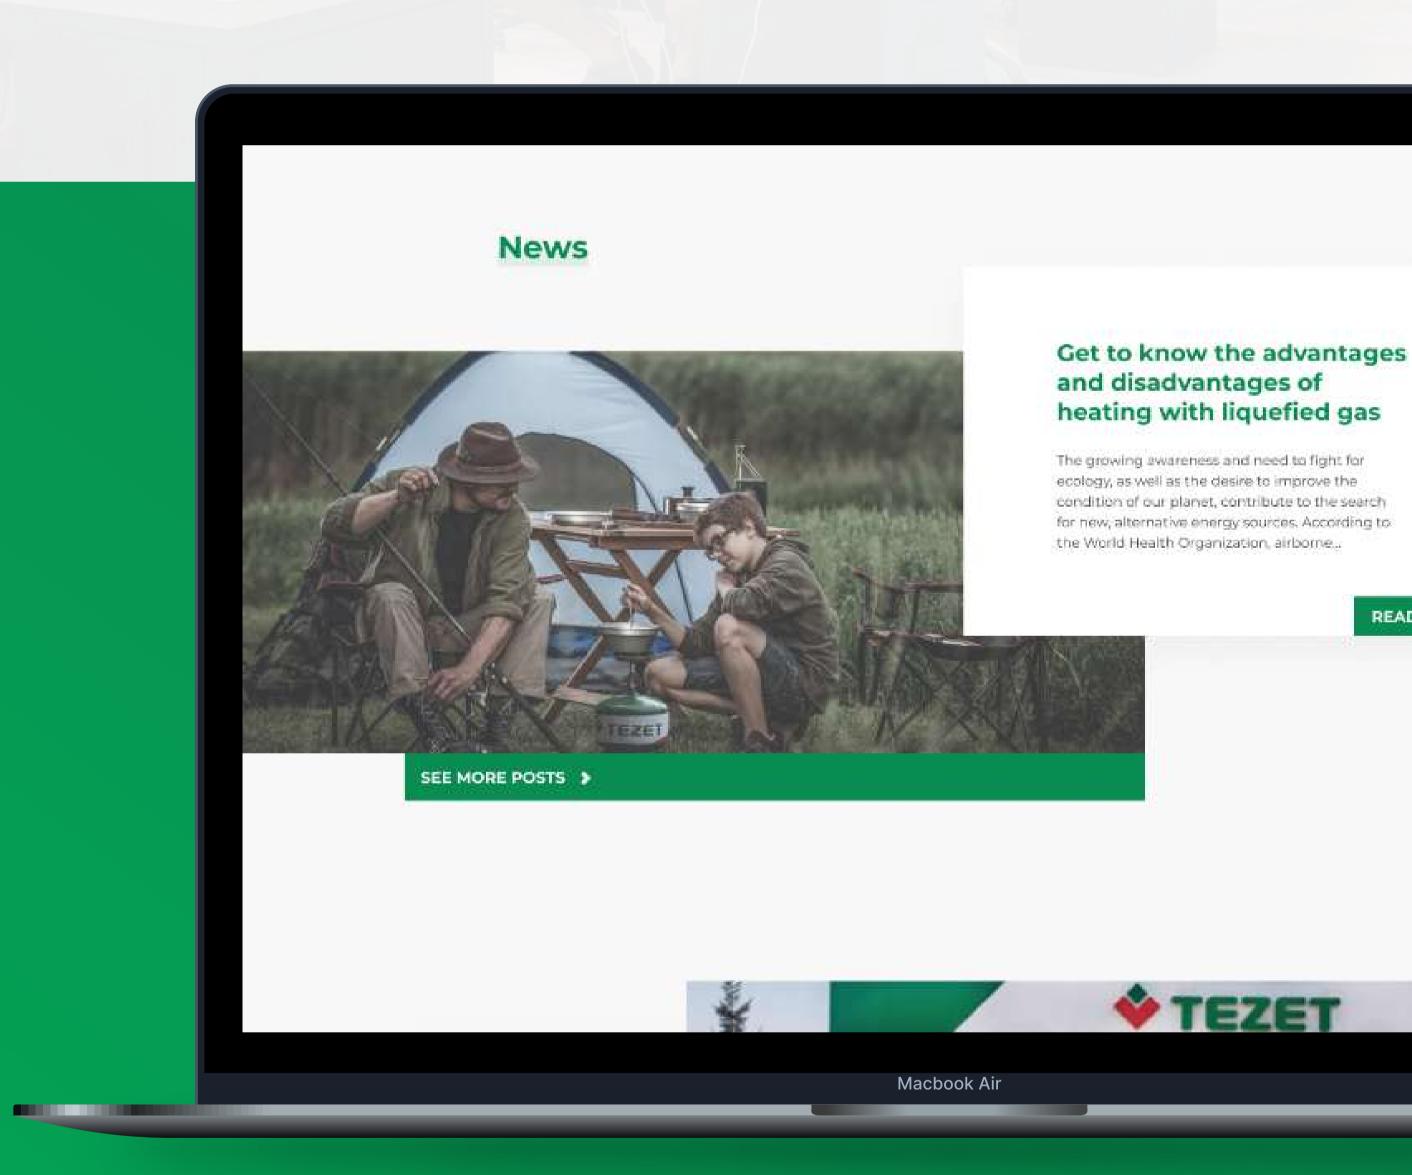

This approach provided a solid foundation for the application's interface, ensuring it was both user-friendly and visually appealing.

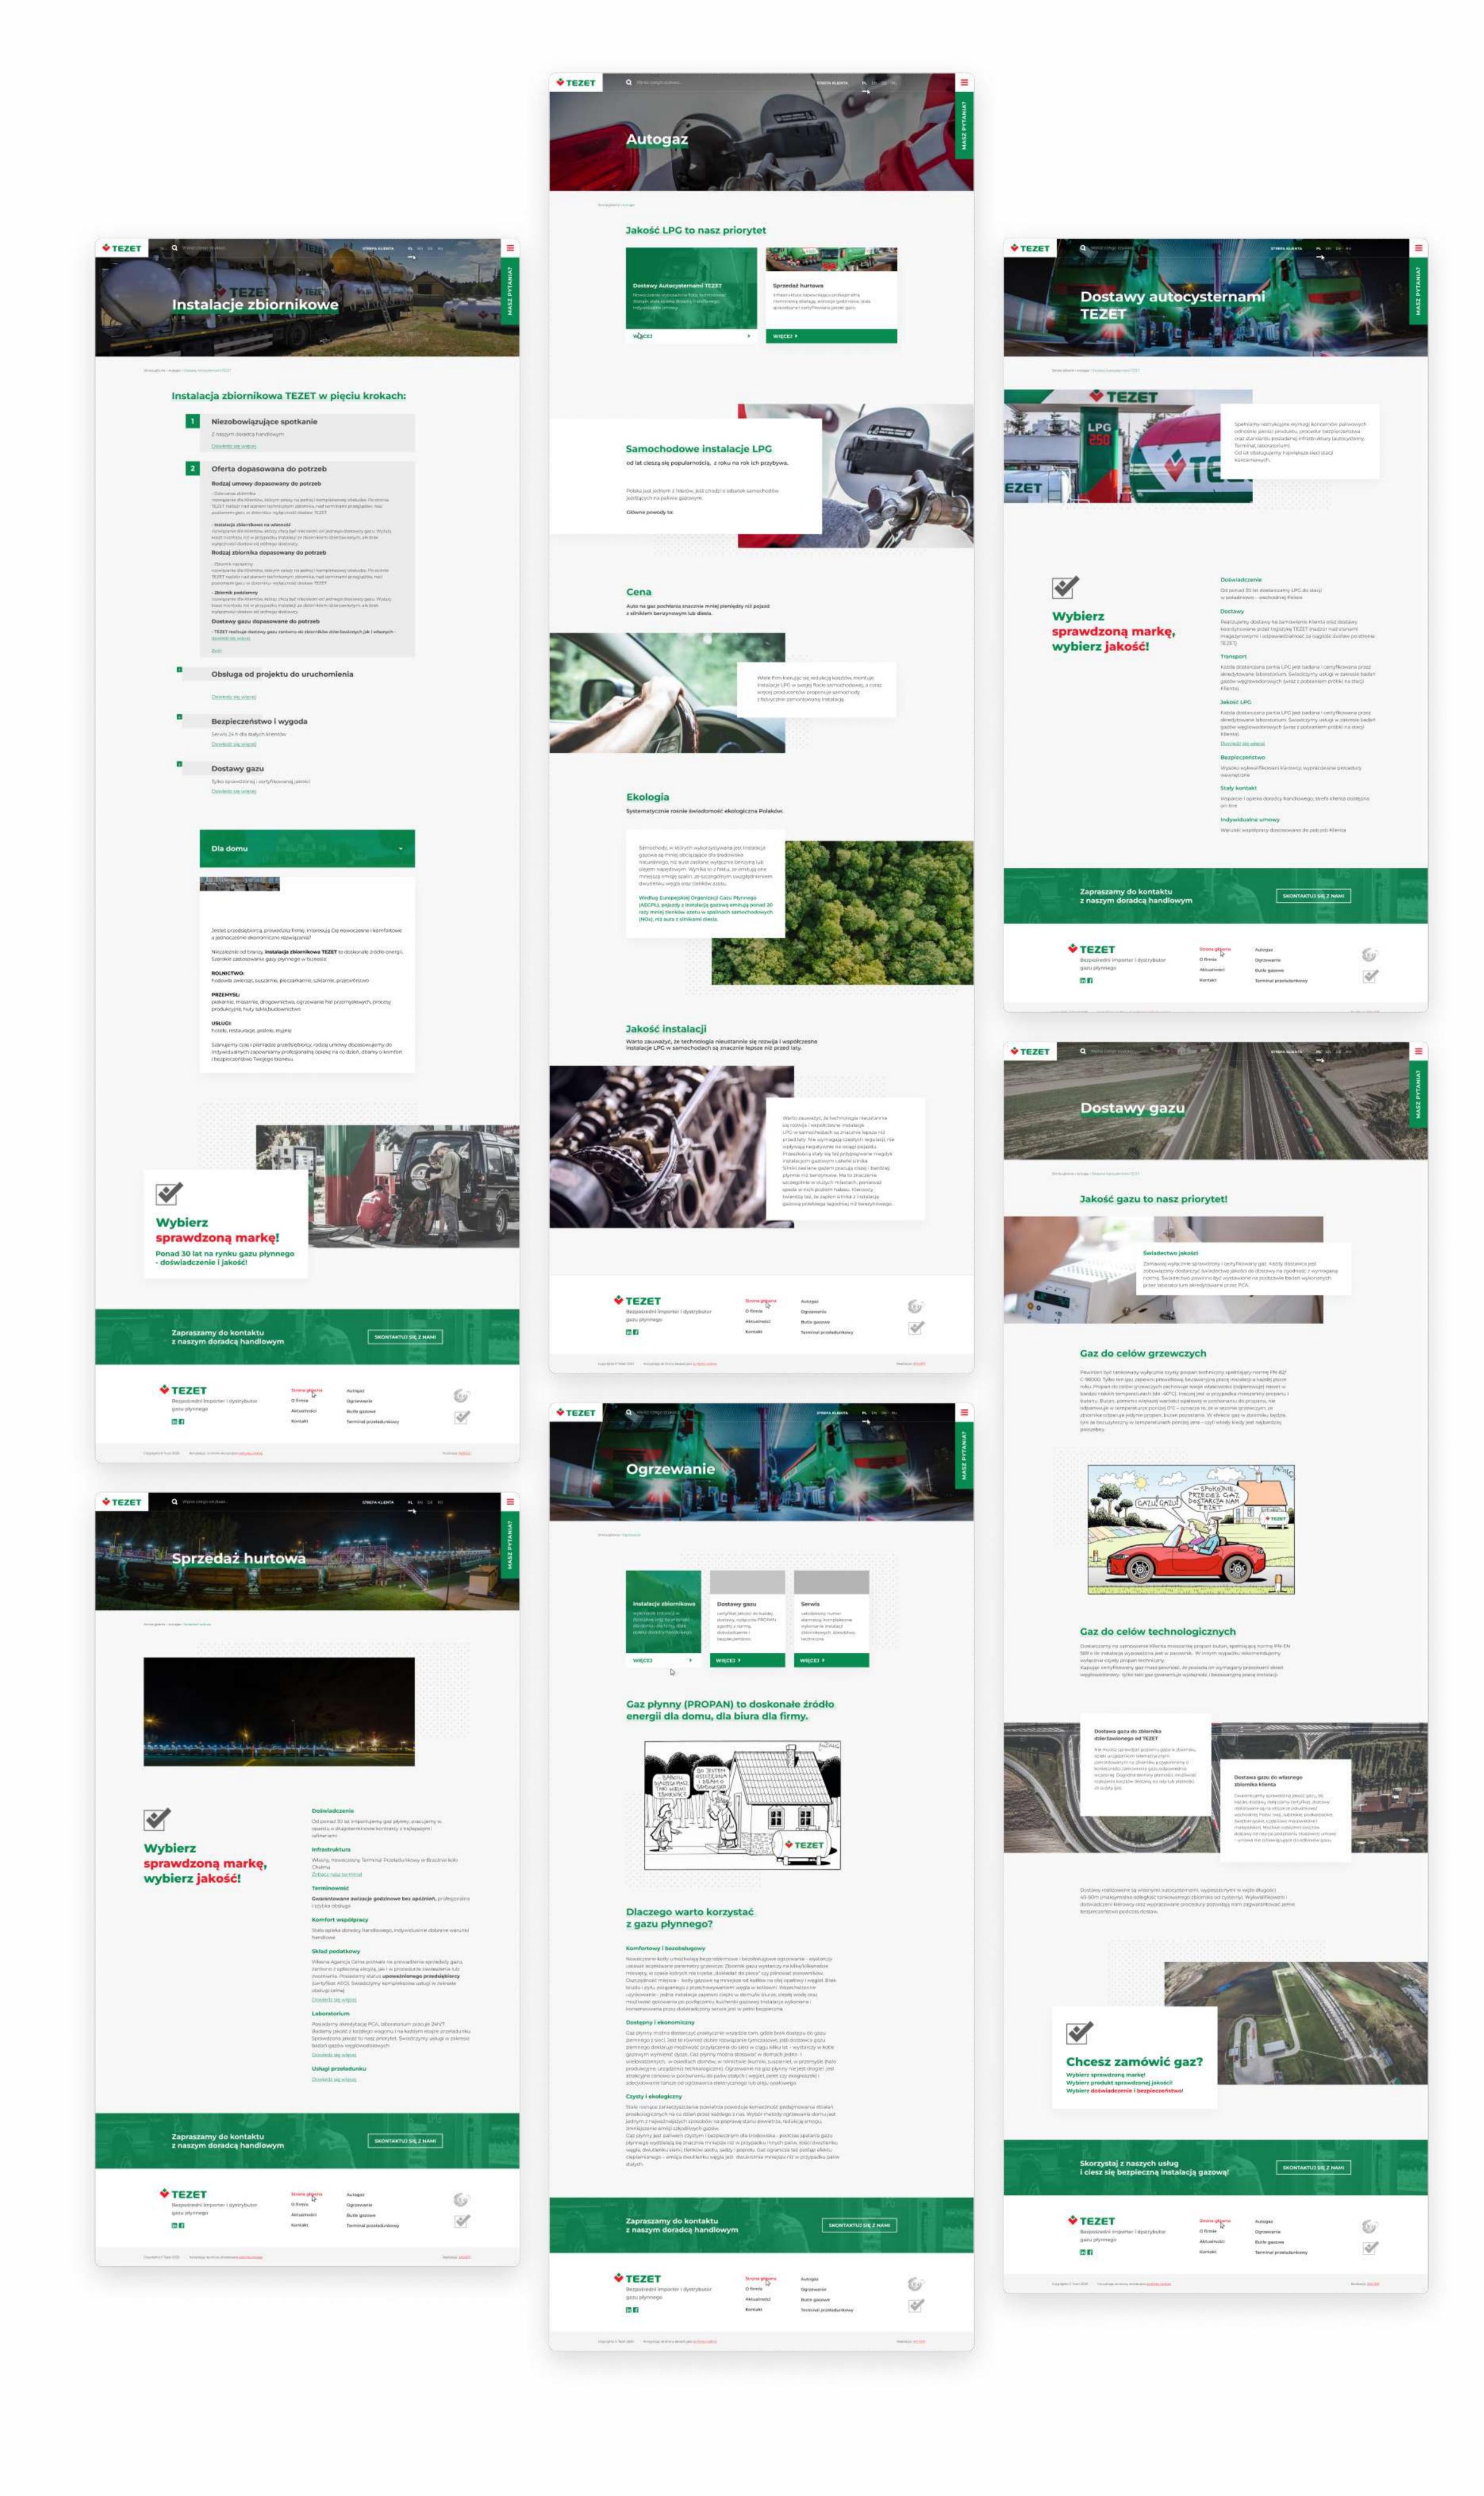

Results

The final product is the TEZET application, designed to meet the unique requirements of a company specializing in Autocystern deliveries, wholesale distribution, gas heating solutions, and the import of high-quality products.

Leveraging the 300DEVS Angular CDK and Google Material design principles, the app offers an intuitive and reliable platform for TEZET's diverse range of services, ultimately enhancing their business operations.
