Workshops:

Macbook Air

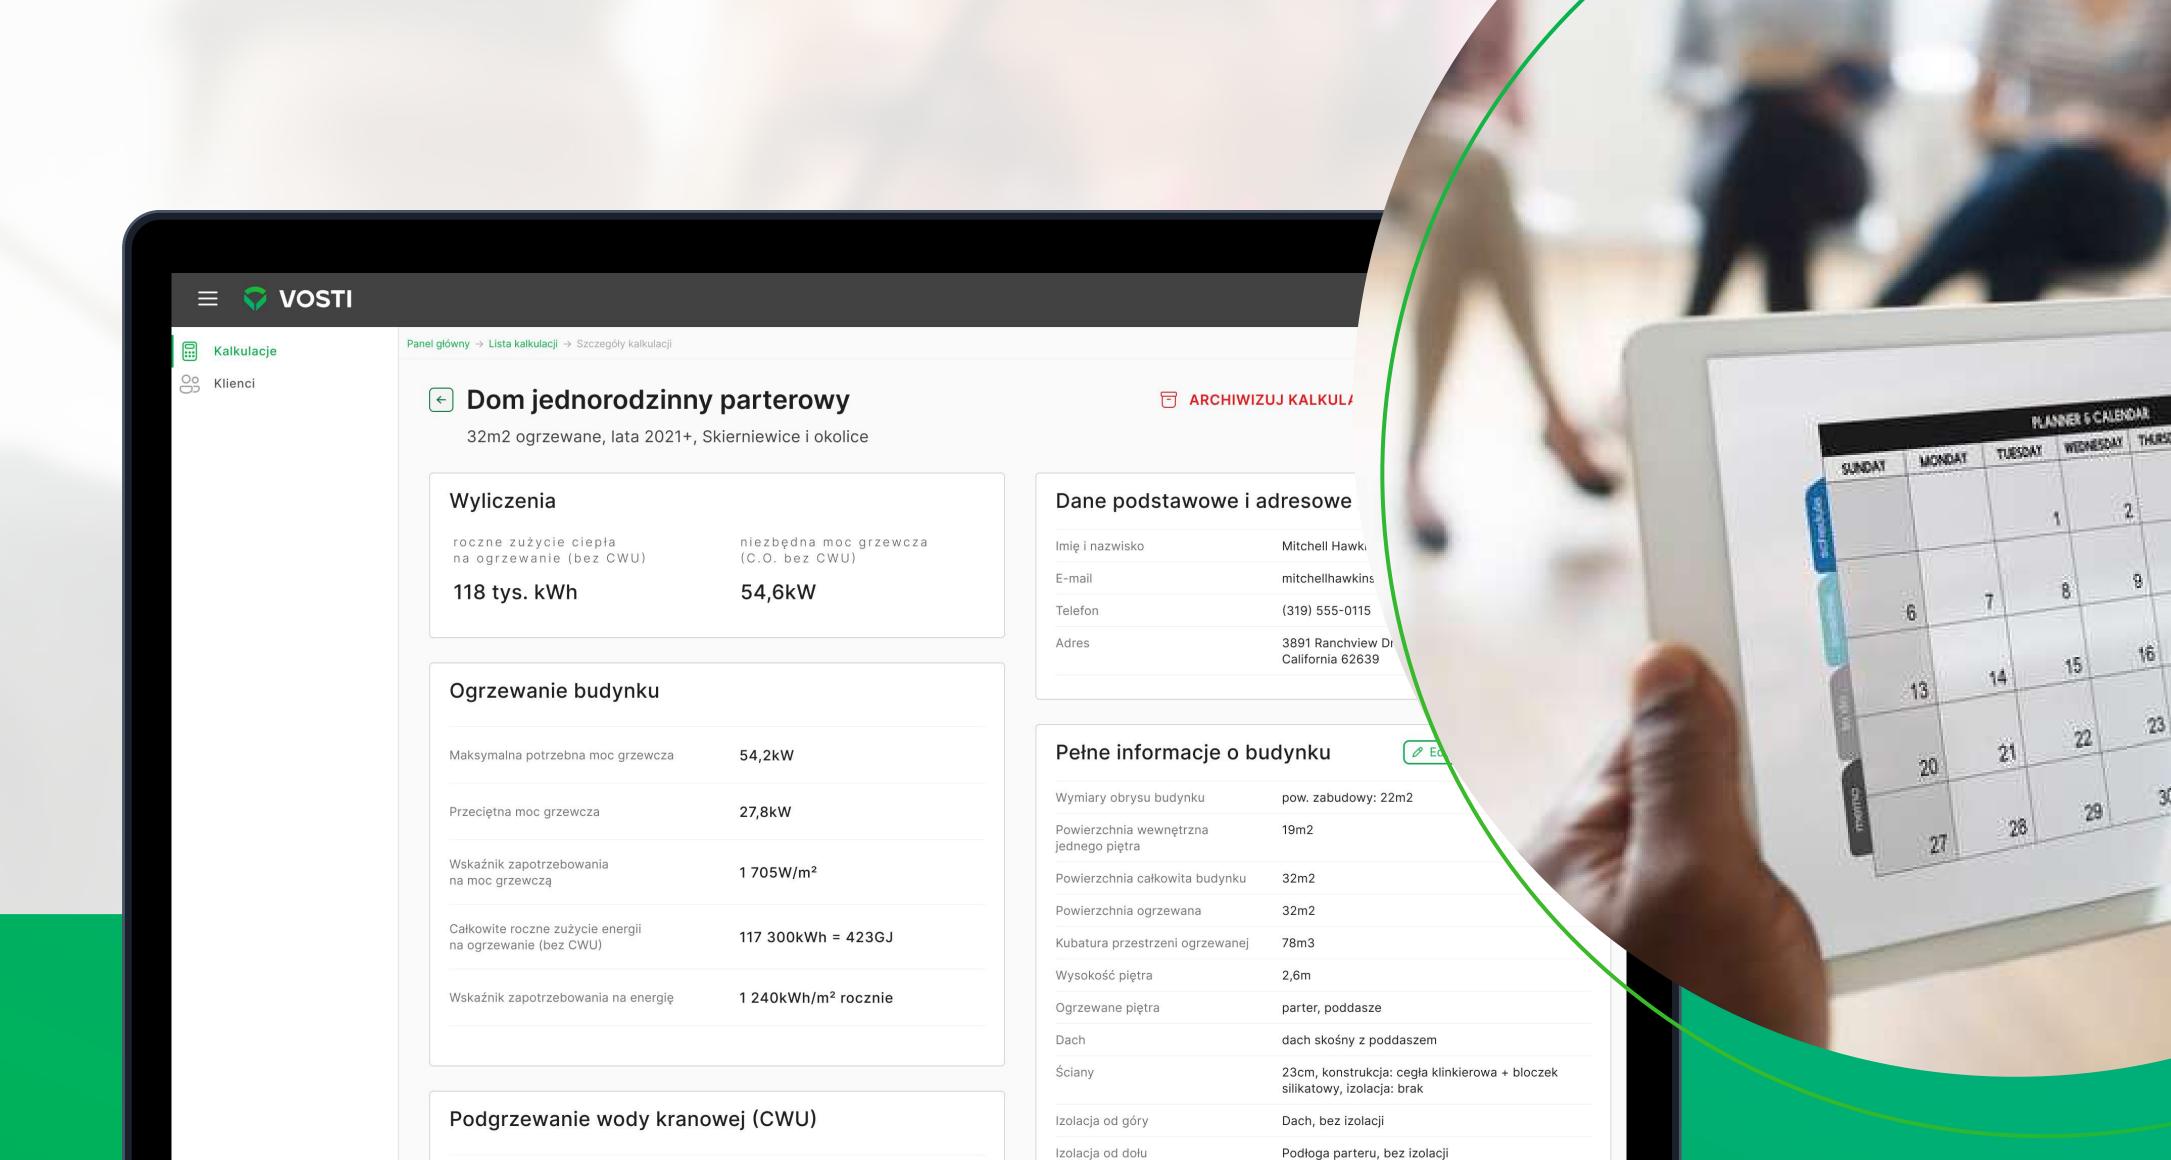

Through discussions and brainstorming, we align our vision and ensure a shared understanding of project goals and requirements.

Designs

Close collaboration with the client during the design phase allowed us to understand project goals and sales team requirements.

This led to the creation of wireframes and user stories, resolving design disparities and optimizing workflows.

Testing

with prototypes, we collected valuable user feedback and identified the need for additional features to enhance data consistency and streamline information flow.

During the UX testing phase

Mockup

The mockup phase involved the development of over 50 screens and a complex form with nearly 100 interdependent fields, facilitated by the "300DEVS Angular CDK" ecosystem.

Macbook Air

User experience testing refined the application, identified the need for additional features, and ensured a seamless visual design in line with the brand's identity.

Coding

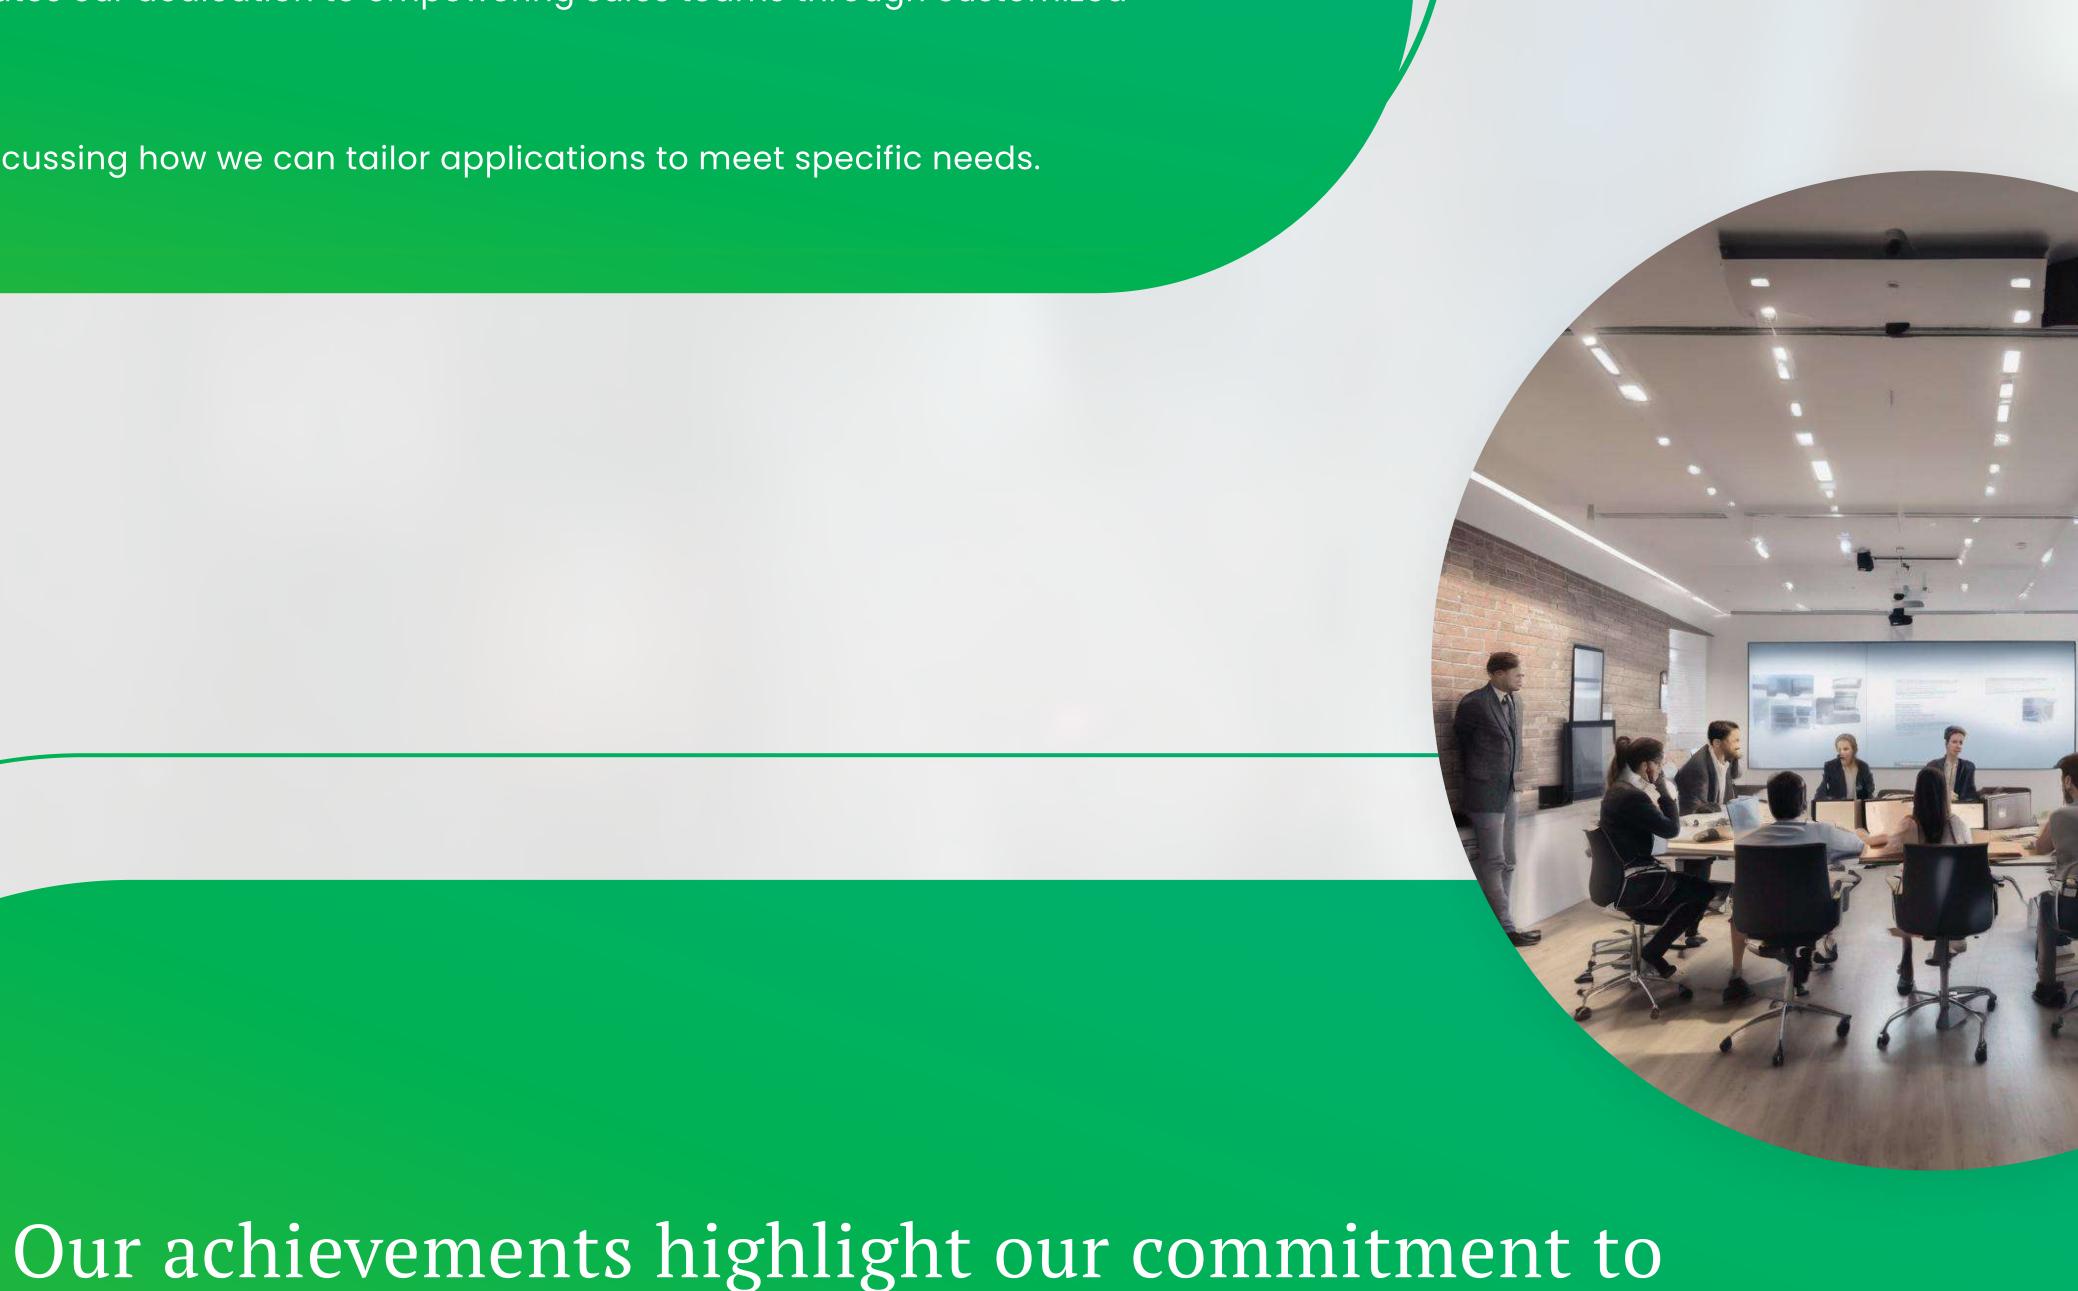

The Angular development team collaborated closely with the client's back-end experts to swiftly implement the project.

Leveraging the "300DEVS Angular CDK" ecosystem, we ensured rapid development while adhering to the brand's visual identity.

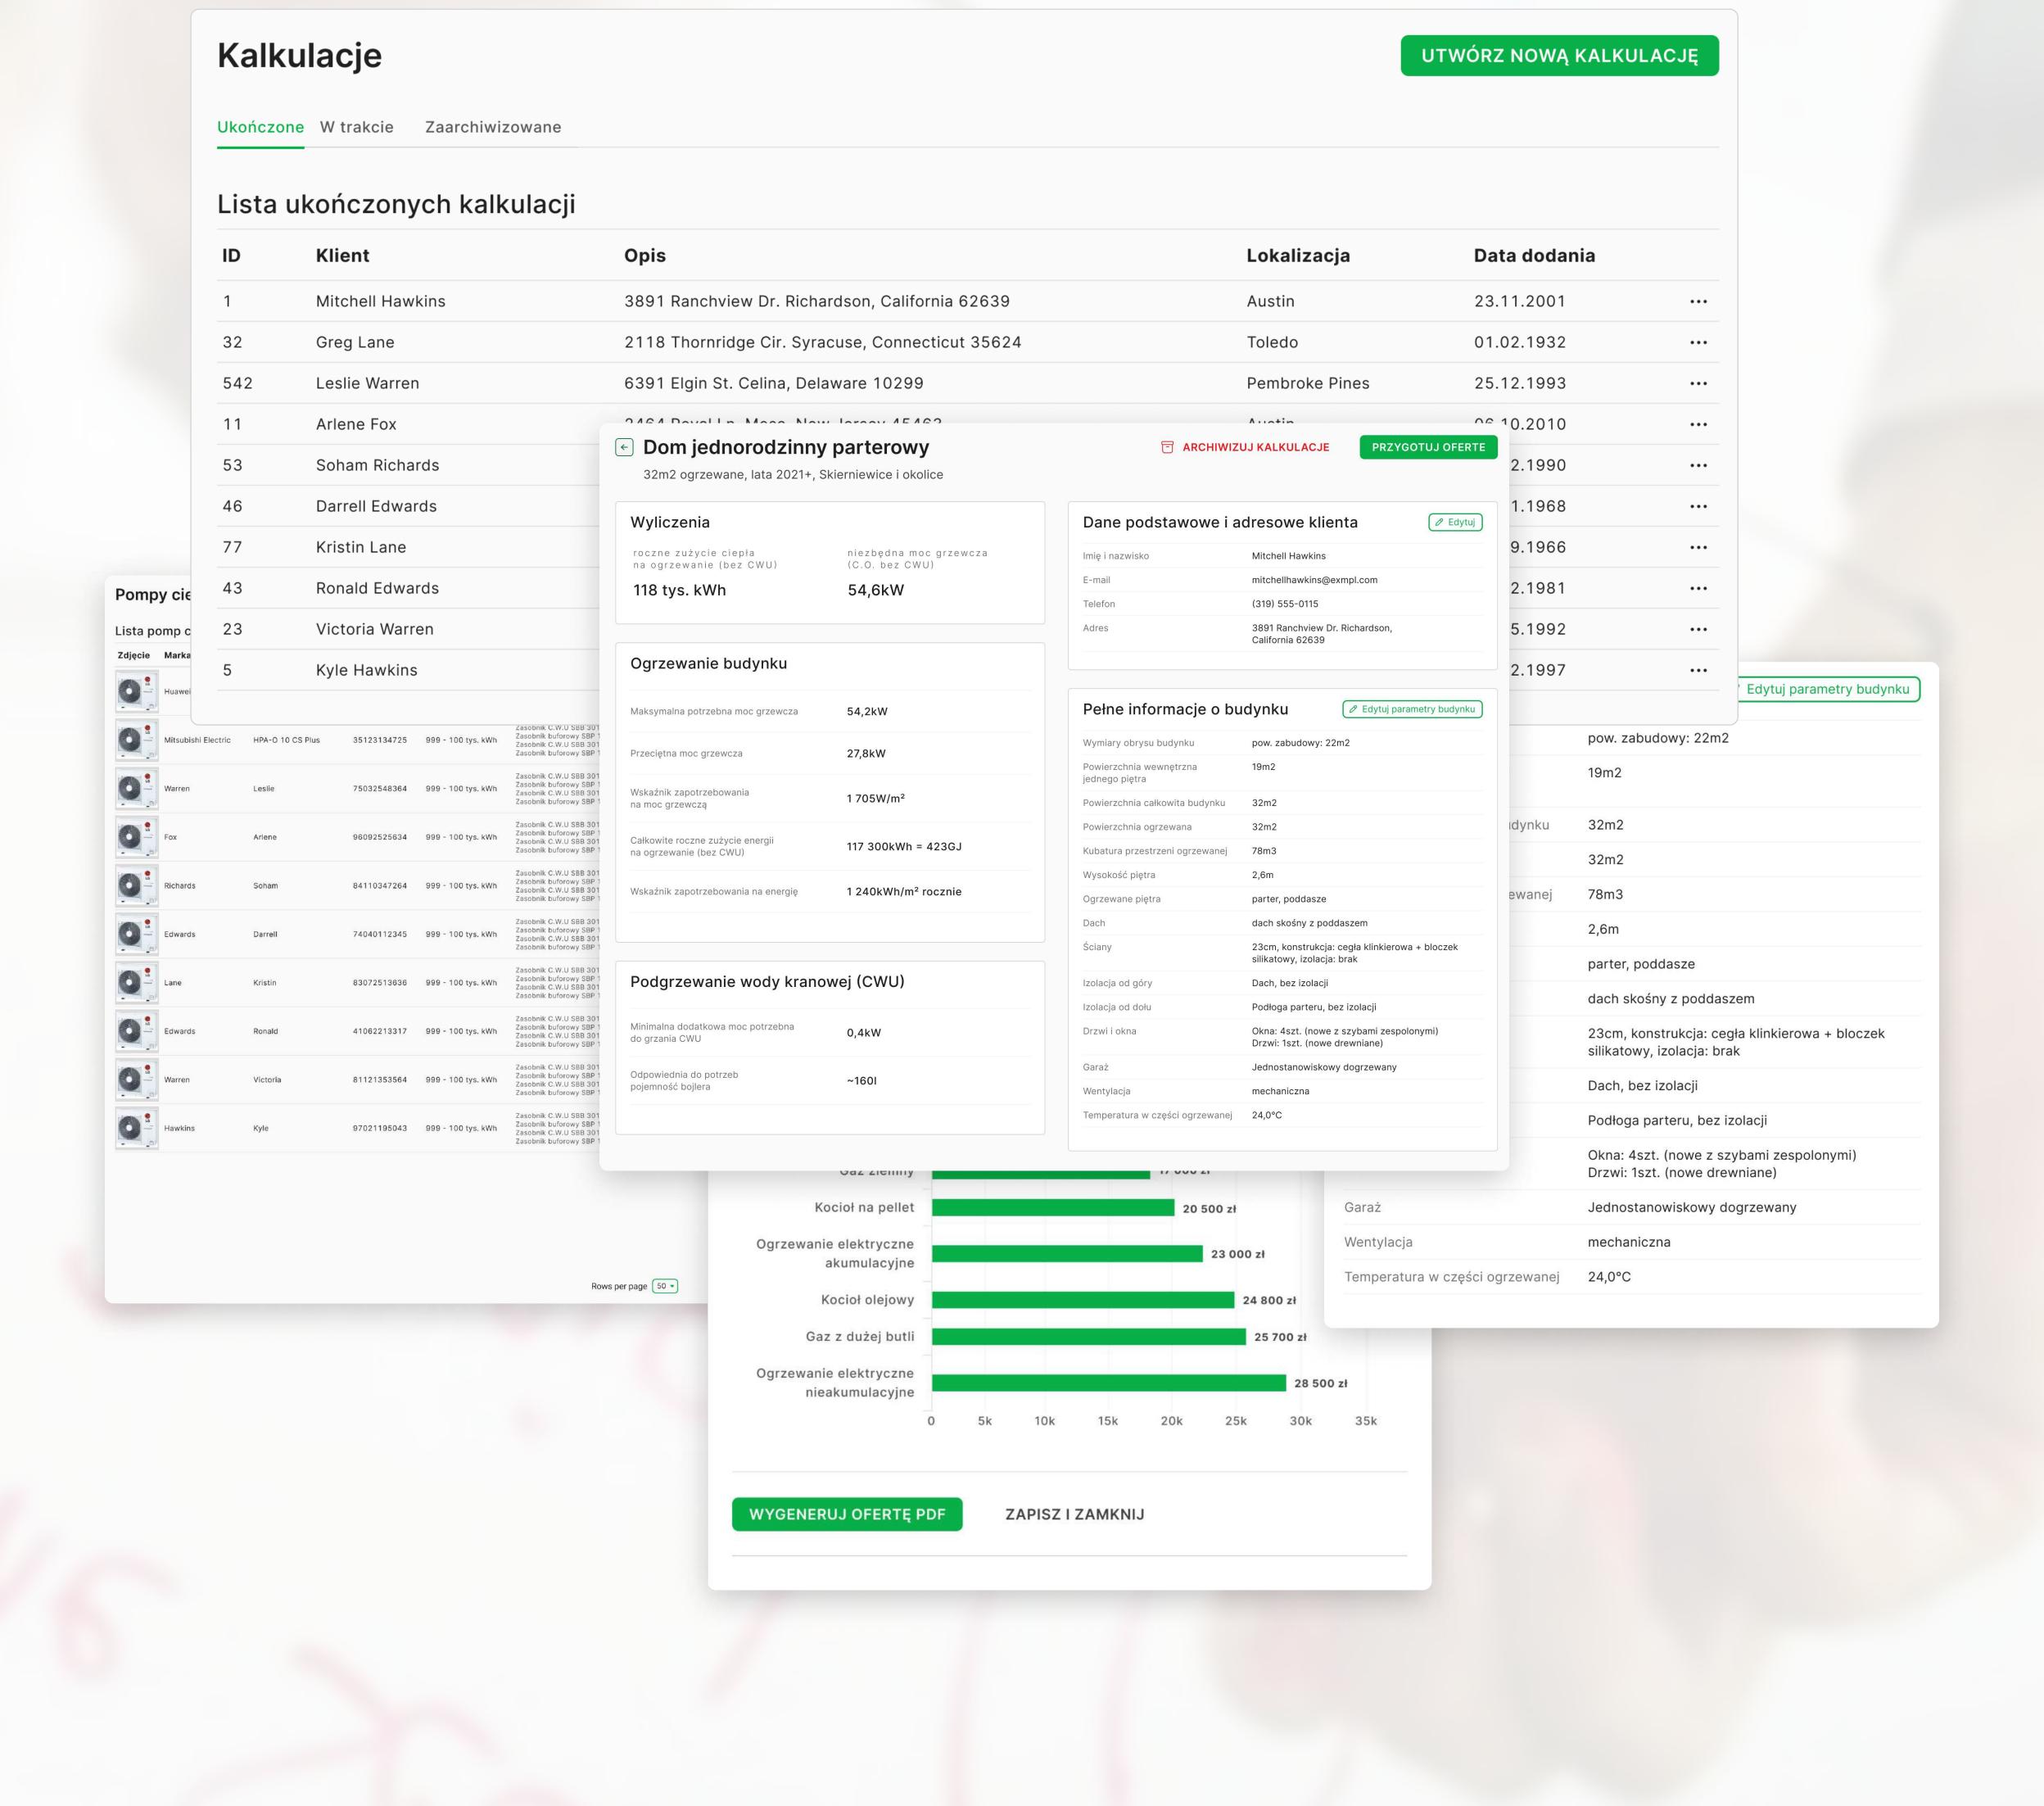

Results

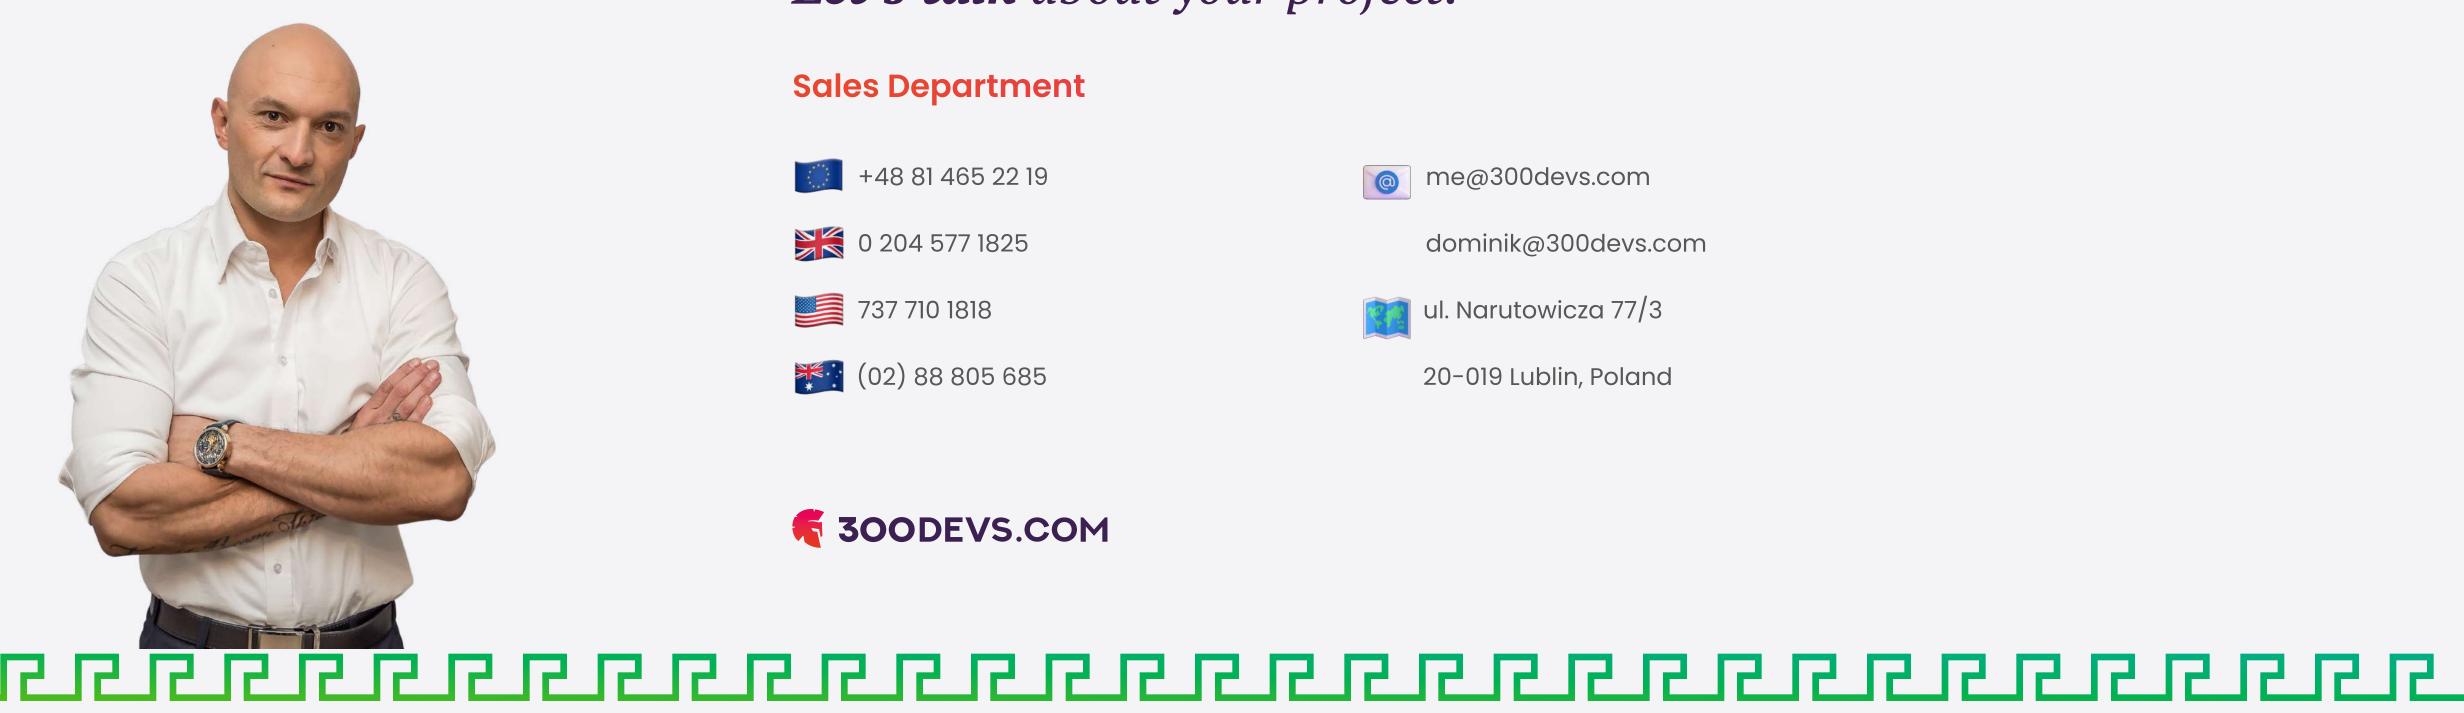

solutions. We look forward to discussing how we can tailor applications to meet specific needs.

Our project demonstrates our dedication to empowering sales teams through customized

creating the perfect solution for you. Contact us to discuss tailoring an application to your specific needs.
